

Notice of Matamec Kipawa Feasibility Study Results Analysts Conference Call

22.08.2013 | [Marketwire](#)

MONTREAL, QUEBEC--(Marketwire - Aug 22, 2013) - **Matamec Explorations Inc.** ("Matamec" or the "Company") (TSX VENTURE:MAT)(OTCQX:MHREF) will release its Kipawa Feasibility Study Results on Wednesday, September 4, 2013 prior to market opening. Following the release, the Company will hold an analysts conference call at 10:00 a.m. (ET) hosted by the management team. The Company cordially invites all interested parties to participate in this call.

CONFERENCE CALL DETAILS:

DATE: Wednesday, September 4, 2013
TIME: 10:00 a.m. ET
DIAL IN NUMBER: 1-800-381-7839 (Canada / U.S.) or
416-981-9000 (International)

A live webcast of the call can be accessed through our website at: www.matamec.com. A copy of the presentation will be available on our website prior to the webcast.

If you are unable to participate in the conference call, a replay will be available starting that same day at 12:00 p.m. ET by dialing 1-800-558-5253 (Canada and United States) or 416-626-4100 (International) and entering passcode 21667794#, until September 18 at midnight.

About Matamec

Matamec Explorations Inc. is a junior mining exploration company whose main focus is in developing the Kipawa HREE deposit with TRECan. Following the positive conclusion of the PEA study filed on SEDAR in March 2012 (resources that are not mineral reserves do not have demonstrated economic viability), Matamec and TRECan, JV partners, decided to move directly to the feasibility study.

In parallel, the Company is exploring more than 35 km of strike length in the Kipawa Alkalic Complex for rare earths-yttrium-zirconium-niobium-tantalum mineralization on its Zeus property. Since 2008, Matamec discovered many potential showings. Particularly, it drilled the PB-PS Zone in the fall of 2012 and identified similar Eudialyte-Mosandrite/Yttrio-Tantalite/Briholite associated mineralization founded at the HREE Kipawa Deposit. This type of mineralization is presently known over 200 metres long and it opens laterally and at depth. The Company plans to drill these extensions later this year.

The Company is also exploring for gold, base metals and platinum group metals. Its gold portfolio includes the Matheson JV property located along strike and in close proximity to the Hoyle Pond Mine in the prolific mining camp of Timmins, Ontario. In Quebec, the Company is exploring for lithium and tantalum on its Tansim property and for precious and base metals on its Sakami, Valmont and Vulcain properties.

"Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release."
