TORONTO, ONTARIO -- (Marketwired - Jan. 13, 2014) - [Uranium Participation Corporation](#) ("UPC" or the "Corporation") (TSX:U) reports results for the third quarter ended November 30, 2013. All amounts are in Canadian currency unless otherwise noted.

Total equity ("net asset value") increased \$12.6 million in the three months ended November 30, 2013 primarily due to unrealized gains on investments of \$13.7 million. Net asset value declined \$76.7 million for the nine months ended November 30, 2013 primarily due to unrealized losses on investments of \$73.6 million. Unrealized gains and losses on investments were caused by fluctuating U3O8 and UF6 spot prices which strengthened during the third quarter but remained below spot prices at the start of the financial year.

This compares to the decline in net asset value of \$75.1 million for the three months ended November 30, 2012 and \$116.9 million for the nine months ended November 30, 2012 primarily due to unrealized losses on investments of \$75.2 million and \$117.4 million, respectively. Unrealized losses on investments in the comparative period resulted from the decline in U3O8 and UF6 spot prices.
