

International Lithium Reports Results from the 2014 Annual General Meeting

24.01.2014 | [The Newswire](#)

Vancouver, B.C. January 24, 2014, [International Lithium Corp.](#) (the "Company" or "ILC") (TSX VENTURE:[ILC.V](#)) held its Annual General Meeting on January 23, 2014 and is pleased to announce that all resolutions proposed in the information circular were passed. In addition, all agenda items, as outlined in the circular, were approved and all directors standing for election were re-elected. The Directors for the ensuing year will consist of Mr. Gary Schellenberg, Mr. Kirill Klip, Mr. Mike Sieb, Mr. Wayne Spilsbury and Mr. Xiaoshen Wang.

Mr. Gary Schellenberg was reappointed Chief Executive Officer. Mr. Kirill Klip was reappointed President. Mr. Jerry Bella was reappointed Chief Financial Officer and Secretary.

"Approximately 27 million shares, or 35% of the outstanding shares, were voted at the meeting with shareholders giving overwhelming support for the direction Management and the Board of Directors are taking the Company," commented Gary Schellenberg.

Mr. Kirill Klip stated, "We are working to advance our Blackstairs Lithium project early in 2014 under the ten million dollar joint venture with strategic partner Ganfeng Lithium Co. Ltd. ("GFL"). We are also working with GFL on a corporate structure that will enable the companies to move forward on the Mariana lithium-potash brine project in Argentina."

About International [Lithium Corp.](#)

[International Lithium Corp.](#) is an exploration company with an outstanding portfolio of projects, strong management ownership, robust financial support and a strategic partner and keystone investor Ganfeng Lithium Co. Ltd., a leading China based lithium product manufacturer.

The Company's primary focus is the Mariana lithium-potash brine project, within the renowned South American "Lithium Belt" that is the host to the vast majority of global lithium resources, reserves and production. The 160 square kilometre Mariana project strategically encompasses an entire mineral rich evaporate basin that ranks as one of the more prospective salars or 'salt lakes' in the region.

Complementing the Company's lithium brine project are rare metals pegmatite properties in Canada and Ireland. These projects reported highly encouraging lithium mineralization in drill holes targeting pegmatites that are unexposed at surface (news releases dated April 3, 2013 and June 25, 2013).

With the increasing demand for high tech rechargeable batteries used in vehicle propulsion technologies and portable electronics, lithium is paramount to tomorrow's "green-tech" economy. By positioning itself with solid development partners and acquiring high quality grass roots projects at an early stage of exploration, ILC aims to be the green tech resource explorer of choice for investors and build value for its shareholders.

On behalf of the Board of Directors,

Kirill Klip

President, [International Lithium Corp.](#)
