The Zafranal PFS will comply with National Instrument 43-101 Canadian Guidelines for a PFS and include the results of a program of in-fill, geotechnical, water exploration and condemnation drilling. In addition, the Company will carry out a formal Environmental and Social Baseline Study and other engineering and environmental studies that will be required for the eventual preparation of an Environmental Impact Assessment for the Project. The PFS is expected to take approximately 18 months to complete with an associated peak workforce of approximately 240 employees and contractors.

AQM CEO, Bruce Turner stated, "We are very pleased to have CMZ Board approval for this important step in the ongoing development of the Zafranal Project. As a result of our transaction with Mitsubishi Materials Corporation in August 2013, AQM's share of the Zafranal PFS is fully funded. Ed Tota, most recently Project Director for Marcobre S.A.C., has been hired as the Project Director for the Zafranal Project. His extensive project experience will help to ensure a high quality PFS for an economically attractive mining asset like Zafranal."
