# Northern Vertex Mining Corp.: Geological Mapping and Sampling Program Commenced

04.09.2014 | Marketwire

## **New Drill Targets To Be Identified**

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Sep 4, 2014) - <u>Northern Vertex Mining Corp.</u> (TSX VENTURE:NEE) (the "Company") is pleased to provide an update on the Company's exploration activities at its earn-in Moss Mine Project site near Bullhead City, Arizona.

The Company has commenced a geologic mapping and sampling program at the Moss project. The objective of this program is to identify and prioritize areas for future drilling where new resources may be discovered. The potential for discovering new gold deposits is considered by management to be excellent.

Dick Whittington, President & CEO, states, "It's exciting to commence the first exploration program on the Moss property outside the main Moss vein system. The combination of the Moss property -- of which only 5% has been explored to date -- and the Silver Creek property, provide excellent potential for new gold discoveries."

As previously announced, there are 21 kilometers of untested strike length in at least nine different structures within the Moss claims as defined by magnetic airborne surveys, historic workings and mapping and preliminary sampling. Additionally, the recent Silver Creek claim option has added another 1,450 hectares of prospective ground with potential to host both high grade vein controlled mineralization and low grade stockwork mineralization. There are five previously identified target areas with gold mineralization ranging from background to 6.23 gpt tonne gold on the Silver Creek claims.

### Specific target areas include:

- 1,500 meters of underexplored Moss structure outside the current resource limits
- Nearly 6 kilometers of unexplored extension of the Gold Road structure that hosts the Gold Road mine that produced 484,000 ounces of gold at 10.0 gpt gold (reported in "The Geology and Ore Deposits of Oatman, Arizona, Arizona Geological Digest vol. 15, 1985)
- Numerous historic workings along known unexplored veins including the Rattan vein where the single drill hole (AR 136) intersected 1.5 m (5 feet) grading 13.072 g/t Au (0.381 opt Au) and 67.0 g/t Ag (1.95 opt Ag)
- Intersection of the Gold Road and Eastern United structures (Gold Road produced 484,000 ounces at 10 gpt and United Eastern produced 769,000 ounces at 35.76 gpt gold; from "the Geology and Ore Deposits of Oatman Arizona, Arizona Geological Digest vol. 15, 1985)
- Five previously identified target areas of the Silver Creek claims

The geologic mapping and sampling program is the first step in evaluating the resource upside of the project. The upside is considered very good given the extensive untested strike length on mineralized/altered structures totaling approximately 21 kilometers and that the three principal ore bodies of United Eastern, Tom Reid and Gold Road occupied strike lengths of 130 to 1,160 meters.

**About Northern Vertex:** Northern Vertex Mining Corp. is a Canadian based exploration and mining company focused on the reactivation of the Moss Mine Gold-Silver Project located in Mohave County, NW Arizona, USA, where the Company has the right to earn-in to a 70% property interest through a Joint

Venture with Patriot Gold Corp. The Moss Mine Gold-Silver Project is an epithermal, brecciated, low sulphidation quartz-calcite vein and stockwork system which extends over a strike length of 1,400 meters and has been drill tested to depths of 220 meters vertically. It is a potential heap leach, open pit project being advanced under a three-phase business plan, specifically designed to ensure that technical, economic, permitting and funding requirements are met prior to each phase proceeding. The Company's management comprises an experienced team with a strong background in all aspects of acquisition, exploration, development, operations and financing of mining projects worldwide. The Company is focused on working effectively and respectfully with our stakeholders in the vicinity of the historical Moss Mine and enhancing the capacity of the local communities in the area.
