

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Oct 6, 2015) - [Bayhorse Silver Inc.](#) (TSX VENTURE:BHS) (the "Company" or "Bayhorse") reports that it has accessed the first stope at the Bayhorse Silver Mine, East Central Oregon, USA. American Mining and Tunneling, its underground safety operations contractor, has already stockpiled approximately 100 tons of mineralized material from the stope as it continues the safety work program.

Photos and video of recent work and samples of stope mineralization can be viewed on the Company's website at: <http://www.bayhorsesilver.com/media/muckeratwork.mov> and at: <http://www.bayhorsesilver.com/bayhorse-silver-mine/underground-operations-image-gallery>.

The mineralized material from the Intermediate Level is currently being stockpiled outside the adit. Random mineralized samples have been submitted for assay from both the stope and the stockpile to Met-Solve Mineral Laboratories. Excellent examples of mineralized stockworking are evident in the samples.

The mineralized material will also be subject to additional Dense Media and Ore-Sorting analysis and the results will be compared to the already conducted tests using reject material from the 1984 mining program to determine the best optimization of mineralization upgrading equipment.

The Company intends to remove the substantial amount of the broken mineralized material that remains in the stopes from the 1984 mining program as each stope is accessed and made safe for continued exploration.

[Bayhorse Silver Inc.](#) is a junior exploration company that is earning an 80% interest in the historic Bayhorse Silver Mine, Oregon, USA. It has a 100% interest in the Alexander River high grade New Zealand gold prospect, in the highly prolific West Coast South Island gold fields of New Zealand, which offers investors the potential for a major gold discovery.

Additionally the Company has retained a 30% Net Profit Interest in the Flagstaff barite mine in Washington State. The Company has an experienced management and technical team with extensive exploration expertise.

This News Release has been prepared on behalf of the [Bayhorse Silver Inc.](#) Board of Directors, which accepts full responsibility for its contents.

The technical content of this press release has been approved by Dr. S. A. Jackson, P.Geo., a Qualified Person and Technical Advisor to the Company.
