

VANCOUVER, BRITISH COLUMBIA--(Marketwired - Jun 13, 2016) - WestKam Gold Corp. (TSX VENTURE:WKG) (the "Company" or "WestKam") is pleased to report that a crew has been mobilized to initiate dewatering of the underground decline and site commissioning on the company's Bonaparte Project, located 50 kilometres northwest of Kamloops, British Columbia.

On April 20, 2016, WestKam received a permit from the British Columbia Ministry of Energy and Mines for the purpose of extracting a 10,000 tonne bulk sample from the company's Bonaparte Project. The permitted design of the Bulk Sample program includes extension of the existing decline approximately 245m through to the Grey Jay / Crow vein system. A crew has been mobilized to prepare the site for the upcoming bulk sample program. Dewatering of the flooded underground adit began on Sunday May 29, 2016 and was completed on Wednesday June 1, 2016. Prior to commencing any new underground development, the stability of the existing decline will be evaluated, and a Ground Control Plan is to be submitted to the Chief Inspector of Mines for approval.

"I'm very pleased with the progress we've made in such a short time," said Matt Wayrynen, WestKam's President and CEO. "I think shareholders can look forward to an active summer and fall at Bonaparte. We believe the information we gain from this program will help us take a major step forward in our project development."

In 1994, an open cut bulk sample program was completed from surface on the Grey Jay / Crow vein system. A total of 3,700 metric tons of mineralized quartz vein material was shipped to the Cominco Smelter located in Trail B.C., yielding approximately 98kg (3,160 oz gold) of gold. The shipped ore to the Trail Smelter graded 26.5gm/tonne Au.

In 2010 a second bulk sample shipment from the Grey Jay / Crow vein system was trucked to the Kinross Mill located in Washington State for processing. A total of 364.6 dry short tons of mineralized quartz vein material averaging 0.475 oz/ton Au were processed yielding 161.95 troy ounces of gold at a recovery rate of 93.51%.
