

Vancouver, British Columbia--(Newsfile Corp. - June 15, 2016) - International Lithium Corp. (TSXV: ILC.V) (the "Company" or "ILC") held its Annual General Meeting on June 15, 2016 and is pleased to announce that all resolutions proposed in the information circular were passed. In addition, all agenda items, as outlined in the circular, were approved and all directors standing for election were re-elected. The Directors for the ensuing year will consist of Mr. Gary Schellenberg, Mr. Kirill Klip, Mr. Mike Sieb, Mr. Wayne Spilsbury and Mr. Xiaoshen Wang.

Mr. Gary Schellenberg was reappointed Chief Executive Officer, Mr. Kirill Klip was reappointed President, Mr. Jerry Bella was reappointed Secretary and Chief Financial Officer, Mr. John Harrop was reappointed Vice President of Exploration and Mr. Anthony Kovacs was reappointed Chief Operating Officer.

"Approximately 36.5 million shares, or 43% of the outstanding shares, were voted at the meeting with shareholders giving overwhelming support for the direction Management and the Board of Directors are taking the Company," commented Gary Schellenberg.

About International Lithium Corp.

[International Lithium Corp.](#) is an exploration company with an outstanding portfolio of projects, strong management ownership, robust financial support and a strategic partner and keystone investor Ganfeng Lithium Co. Ltd., a leading China based lithium product manufacturer.

The Company's primary focus is the Mariana lithium-potash brine project, a joint venture with Ganfeng Lithium Co. Ltd. within the renowned South American "Lithium Belt" that is the host to the vast majority of global lithium resources, reserves and production. The 221 square kilometre Mariana project strategically encompasses an entire mineral rich evaporate basin that ranks as one of the more prospective salars or 'salt lakes' in the region.

Complementing the Company's lithium brine project are rare metals pegmatite properties in Canada known as the Mavis, Raleigh, and Forgan projects and one in Ireland (Avalonia project). The Avalonia project is under option to strategic partner Ganfeng Lithium and the Mavis project with strategic partner [Pioneer Resources Ltd.](#) (PIO: ASX). The Mavis, Raleigh and Forgan projects together form the basis of the Company's newly created Upper Canada Lithium Pool designated to focus on acquiring numerous prospects with previously reported high concentrations of lithium in close proximity to existing infrastructure.

With the increasing demand for high tech rechargeable batteries used in vehicle propulsion technologies and portable electronics, lithium is paramount to tomorrow's "green-tech" economy. By positioning itself with solid development partners and acquiring high quality grass roots projects at an early stage of exploration, ILC aims to be the green tech resource explorer of choice for investors and build value for its shareholders.

On behalf of the Board of Directors,

Kirill Klip
President, International Lithium Corp.
