

Shandong, China (ABN Newswire) - China's gold industry now witnesses steady increase in gold output as well as leapfrogging development of entire industry chain ranging from prospecting, mining and metallurgical processing to consumption, investment and trade. Technological strength and innovation capability of enterprises play a key role for their sustainable development.

The 2016 China Gold Technology Conference, themed "Science & Technology Leadership and Innovation-driven". The topic of the forum will be focused on the exploration and development of deep mineral resources, aims at improving production efficiency, reducing production costs of enterprises, facilitate the construction of safe environmental protection and green mines by the application of digitalization and informatization of mining technologies.

The conference this year will help effectively strengthen mutual exchanges and interaction between Chinese gold enterprises and relevant service providers in and outside of China, so as to facilitate the technological innovations and changes of gold enterprises in China.

We are looking forward to meeting you in China Gold Mining Technology Forum at Zhaoyuan city, Shandong Province.
