

BLAINVILLE, QUÉBEC--(Marketwired - Nov. 21, 2016) - Maya Gold & Silver Inc. ("Maya" or the "Corporation") (TSX VENTURE:MYA) is pleased to report a production of 39,224 ounces of silver (1360Kg) during the month of October 2016 at its Zgounder silver mine in Morocco.

October 2016 Operations Highlights

- 39,224 ounces (1220 Kg) of silver ingots were produced from 3764 tonnes of processed dry material presenting an average head grade of 403 g/t Ag;
- A total recovery rate of 80.4% was achieved;
- A decrease in production was related to breakdowns of the power generator breakers (due to thunderstorm) generating multiple stoppages and the operation of the main plant at reduced capacity; the problem was solved and the plant was operating at full capacity at the end of October.

Principal location and level of the extraction zones during the month of October.

Forward looking information

Zgounder Silver Mine

The decision to commence production at the Zgounder Silver Mine was not based on a feasibility study of mineral reserves demonstrating economic and technical viability, but rather on a pre-feasibility study. Accordingly, there is increased uncertainty and economic and technical risks of failure associated with this production decision. Production and economic variables may vary considerably, due to the absence of a complete and detailed site analysis according to and in accordance with NI 43-101.
