

Clean Commodities Announces Commencement of the Inaugural Exploration Program at its Juliet Project Located Adjacent to Critical Elements's Rose Project

15.08.2017 | [CNW](#)

VANCOUVER, Aug. 15, 2017 - [Clean Commodities Corp.](#) (TSX-V: CLE) ("Clean Commodities" or the "Corporation") is pleased to announce that the Corporation has commenced a work exploration program at its Juliet Lithium Project, located approximately 30km north of Nemaska (Nemiscau), Quebec. The Juliet Lithium Project is adjacent to and contiguous with the Rose Project being advanced by [Critical Elements Corp.](#).

Clean Commodities helicopter-supported, multi-crew exploration program commenced on August 13th and is focused on field sampling and prospecting targets identified within the project. The exploration program represents the Corporation's inaugural exploration of the Juliet Lithium Project.

"Since our acquisition of the Juliet Lithium Project last summer, we have been eager to conduct our first exploration program on this prospective, grass-roots lithium project. Recent capitalization growth in our project neighbour, [Critical Elements Corp.](#), serves to highlight the exploration merit of the area and recognition by the capital markets of the region as a prospective new lithium district. We are pleased to have a fully-funded exploration program underway and shall update our shareholders following completion of the program," stated Ryan Kalt, Chief Executive Officer of Clean Commodities.

About the Juliet Lithium Project

The Juliet Lithium Project was acquired by Clean Commodities in June 2016. The project consists of three mineral claim groupings, each of which are contiguous with the Rose Project being advanced by [Critical Elements Corp.](#). The Juliet Lithium Project totals approximately 9,544 ha (approximately 23,574 acres).
