On December 29, 2017, the Corporation entered into an agreement with a primary UF₆ conversion supplier to sell the conversion components contained in 786,241 KgU as UF₆. In connection with this transaction, the Corporation also amended its storage arrangements with the primary supplier to provide for beneficial storage terms that are fixed for the period through December 31, 2028. This transaction has simplified UPC's uranium holdings and, most significantly, will provide storage price certainty on a significant portion of the Corporation's uranium holdings for a period of 11 years.
