Monthly production at the Veta Dorada plant in 2018

In May 2018, the Corporation produced 6,902 ounces of gold (6,205 ounces in May 2017) at its Veta Dorada plant which is similar to the production in the previous month (see Figure 1). During the month of May 7,985 metric tonnes of mineralized material were processed (6.4 % above the forecast of 7,500 MT). Gold grades of the purchased and processed material were less than anticipated resulting in a lower gold production.
