In Q1-2020 Dynacor completed its thirty sixth (36th) consecutive quarter of profits with a net income of \$2.4 M (US \$0.06 per share) compared to \$1.2 M (US \$0.03 per share) for the three-month period ended March 31, 2019 (“Q1-2019”).

Following the state of the emergency decree in Peru, which was declared on March 16, 2020, the Corporation temporarily stopped its ore purchases activities and orderly shut-down its processing operations. However, it was able to pursue exporting its remaining gold production into Q2-2020.

Q-1 2020 OVERVIEW AND HIGHLIGHTS

During Q1-2020, the Corporation's financial situation benefited from the postponement till 2020, of the export of the majority of its December gold production, following the retention by the Peruvian authorities, of our 2,650 ounces gold shipment as well as from the increase in gold market price. Consequently, this contributed to higher sales in the period and a \$9.4 M increase in its cash balance since last year-end.

Due to the high level of ore inventory at the end of 2019 and despite the temporarily shut-down since the third week of March, our plant was able to process 22,901 tonnes of ore in Q1-2020.

Total sales amounted to \$30.9 M compared to \$22.9 M in Q1-2019. The \$8.0 M increase is explained by a higher gold sales price (\$5.2 M) combined with the higher number of ounces sold (\$2.8 M) explained by the decision to delay the shipment of our December production into 2020. Those postponed shipments represented sales of approximately \$8.7 M.

The gross operating margin amounted to \$4.9 M in Q1-2020 compared to \$2.8 M in Q1-2019. The variance compared to 2019 is attributable to higher sales combined with a favorable trend of gold market prices.

Operating activities

During Q1-2020, the cash flow from operations, before changes in working capital items, amounted to \$3.2 M, compared to \$1.9 M in Q1-2019. This increase between quarters is primarily explained by the increase in cash gross operating margin.

Financing activities

The bank loan was fully reimbursed at maturity in February 2020.

OUTLOOK

Since March 16, 2020, the Corporation temporarily stopped its operations in Peru following the state of emergency declared by the Peruvian authorities in response to the COVID-19 worldwide crisis.

The Peruvian authorities just presented a plan to progressively reopen economic activities from late May. This initial plan contains four (4) monthly phases and is subject to changes. The first phase has been officialized and will include the large mining industry. Our activities are not included in this first phase.

We are ready to restart our operations in a safe environment for our employees and suppliers as soon as official government measures will permit.

At the date of this report the Corporation has a solid financial situation and continues to monitor the overall situation and apply its liquidity control plan.
