LabGold Highlights

- Recently acquired Kingsway project encompasses 77km² in the highly prospective Gander gold district of Newfoundland
- Kingsway covers over 16 kilometres of strike length of the Appleton fault zone, associated with New Found Gold’s discovery hole of 92.86 g/t gold over 19 metres
- Project benefits from extensive prior exploration work demonstrating significant gold anomalies in all sample media suggesting a prospective environment for gold mineralization
- Aggressive summer exploration program is planned to delineate targets for fall drilling

Roger Moss, PhD., P.Geo., is the qualified person responsible for all technical information in this release.

The Company gratefully acknowledges the Newfoundland and Labrador Ministry of Natural Resources’ Junior Exploration Assistance (JEA) Program for its financial support for exploration of the Kingsway property.
