

Baselode Energy's Webinar Provides Comparisons of Assay Results from Drill Hole AK21-01

09.12.2021 | [CNW](#)

TORONTO, Dec. 9, 2021 - [Baselode Energy Corp.](#) (TSXV: FIND) (OTCQB: BSENF) ("Baselode" or the "Company") is pleased to present its latest webinar 'What can we take away from the results of AK21-01?'. This webinar provides encouraging comparisons of the recently released Uranium assay results from drill hole AK21-01 with other notable Athabasca high-grade Uranium deposits. Drill hole AK21-01 was the first drill hole in the Company's ACKIO uranium discovery on the 100% owned Hook uranium project ("Hook").

VIDEO 6 - WHAT CAN WE TAKE AWAY FROM THE RESULTS OF AK21-01?

Planned Winter Drill Program on ACKIO

Baselode is planning for a 10,000 metre diamond drill program on the ACKIO discovery to begin in mid- to late-January. Drill holes will be planned to intersect mineralization along strike and dip, which remains open in all directions, and to test for unconformity-style of mineralization. The drill program will be operated with helicopter support to lessen any ground-induced environmental impacts within the project area.

ACKIO is located 30 km southeast of well-established infrastructure including an all-season road and powerline that runs between Cameco Corp.'s (TSX: CCO) and Orano's McArthur River mine and Key Lake Uranium mill joint ventures. ACKIO is located 70 km northeast of the Key Lake mill.

About Baselode Energy Corp.

Baselode currently controls 100% of approximately 227,000 hectares for exploration in the Athabasca Basin area, northern Saskatchewan, Canada. The land package is free of any option agreements or underlying royalties.

Baselode's Athabasca 2.0 exploration thesis is focused on discovering near-surface, basement-hosted, high-grade uranium orebodies outside of the Athabasca Basin. The exploration thesis is further complemented by the Company's preferred use of innovative and well-understood geophysical methods to map deep structural controls to identify shallow targets for diamond drilling.
