Due to an increase of 25.1% in tonnage processed combined with a 5.1% higher gold market price the Corporation sales increased by 22.5% compared to Q1-2021.

Following a +10.1% gain over the Peruvian Sol in 2021, the US dollar has lost 6.5% against the Peruvian Sol in Q1-2022. This reversal impacted favorably and significantly the Q1-2022 current and deferred tax expenses and accordingly the Corporation's Q1-2022 net income.

The \$9.2 million sales increase compared with Q1-2021 is explained by the increased number of gold ounces sold (+\$6.8 million) and by higher selling prices (+2.4 million).

The Q1-2022 gross operating margin amounted to \$7.5 million (15.0% of sales) compared to \$5.3 million (13.0 % of sales) in Q1-2021 and benefited from the increase in selling prices and the favorable trend of gold market prices during the period.

General and administrative expenses amounted to \$1.4 million in Q1-2022. The \$0.2 million increase compared to Q1-2021 is mainly due to increases in salary expenses, and in promotion and investor relation expenses.

The Q1-2022 current tax provision was positively affected by the variance of the Peruvian Sol against the US\$ generating a \$0.5 million favorable variance compared to Q1-2021.

The Q1-2022 net income was also favorably affected by the recording of a \$0.6 million deferred income tax recovery (non-cash) resulting from the increasing value throughout the period of the Peruvian Sol against the US\$ and consequently FX variances applied on long term assets local tax basis. This recovery is generating a \$0.9 million favorable variance compared to Q1-2021. Future fluctuations will affect positively or negatively the deferred tax at the end of each period.
