Denison Reports Financial and Operational Results for Q2 2022, Including Uranium Sales from Production at \$74.65 per lb U3O8

04.08.2022 | CNW

TORONTO, Aug. 4, 2022 - <u>Denison Mines Corp.</u> ('Denison' or the 'Company') (TSX: DML) (NYSE American: DNN) tod Condensed Consolidated Financial Statements and Management's Discussion & Analysis ('MD&A') for the quarter end 2022. Both documents will be available on the Company's website at www.denisonmines.com, SEDAR (at www.sedar. EDGAR (at www.sec.gov/edgar.shtml). The highlights provided below are derived from these documents and should be conjunction with them. All amounts in this release are in Canadian dollars unless otherwise stated. PDF Version

David Cates, President and CEO of Denison commented, "During the second quarter, Denison capitalized on rising ura with the sale of the Company's share of Canadian-origin production received from the successful SABRE mining test on the McClean Lake Joint Venture ('MLJV') in 2021. The SABRE test resulted in the production of over 175,000 lbs U₃O₈ comparison, this test production represents over eight times the total mine production of uranium reported in the United 2021 - highlighting the importance of new sources of low-cost Canadian uranium supply as the global uranium market with sanctions and self-sanctioning against Russian uranium supplies and progresses towards a geopolitical bifurcation product origin could be crucial.

The Company's flagship Wheeler River development project is well positioned to respond to global demand for Canadia uranium, and our efforts through the second quarter have produced several key developments that have advanced the namely, the receipt of regulatory approval from the Province of Saskatchewan to carry out the Feasibility Field Test ('Ff for the Phoenix deposit and the achievement of key metallurgical milestones to define the components necessary for the processing plant and confirm our ability to produce a saleable yellowcake. We were also pleased to report the executio important agreements with Kineepik Métis Local #9 ('KML') for (i) Denison's exploration and evaluation activities within and occupancy area, and (ii) the co-development of an agreement related to the advancement of the proposed Phoenix Recovery ('ISR') uranium mining operation.

During the second half of the year, we are anticipating the completion of ISR field testing initiated at Wheeler River during quarter of the year and the transition of our efforts to focus on the preparation, construction, and operation of the Phoeler From a regulatory standpoint, we are approaching the submission of our draft Environmental Impact Statement for Wheeler River and permitting process. On the side, we will be participating in partner-operated programs and are planning to complete regional exploration drilling process. Wheeler River and Waterbury Lake."

Highlights

- ullet Completed the sale of 40,000 pounds of U₃O₈ from MLJV production at a sales price of \$74.65 (US\$59.25) per p
 - In April 2022, Denison completed the sale of 40,000 pounds of U_3O_8 , representing the Company's share of produ the SABRE test mining program completed at the MLJV in 2021. The uranium was sold at a price of \$74.65 (US\$ pound U_3O_8 .
- Received approval to construct and operate the Phoenix FFT

In July 2022, Denison announced that it had received approval from the Province of Saskatchewan to prepare, comperate the facilities required to carry out the ISR FFT planned for the Phoenix deposit ('Phoenix') at the Compan owned Wheeler River Uranium Project ('Wheeler River' or 'the Project'). The approval was granted by the Saskatch Minister of Environment and authorizes Denison to operate "pollutant control facilities" - which is typical for mining and allows for the management of material recovered from mineral extraction through to waste water treatment, of and storage (as applicable). The approval followed the completion of a process involving the review of and consult the Company's permit application and supporting materials related to the FFT.

 Achieved key milestone for Phoenix with completion of metallurgical test work to define Phoenix process plant co and confirmation of ability to produce Yellowcake

In August 2022, Denison announced the substantial completion of extensive metallurgical test work to define the components for the planned Phoenix processing plant as part of the Feasibility Study underway for Wheeler Rive addition, the metallurgical program has confirmed the ability to produce a yellowcake product that meets industry ASTM C967-13 specifications.

Executed agreements with KML

In June 2022, Denison announced that it has entered into a Participation and Funding Agreement with KML which Denison's and KML's mutual commitment to the co-development of an agreement supporting the advancement of uranium mining operation proposed at Wheeler River. The Company also entered into an Exploration Agreement all of Denison's exploration and evaluation activities within KML's land and occupancy area. These agreements repension's commitment to the principles set out in the Company's Indigenous People's Policy and advancing recontinuity taking action.

About Denison

<u>Denison Mines Corp.</u> was formed under the laws of Ontario and is a reporting issuer in all Canadian provinces and terr Denison's common shares are listed on the Toronto Stock Exchange under the symbol 'DML' and on the NYSE Americ exchange under the symbol 'DNN'.

Denison is a uranium exploration and development company with interests focused in the Athabasca Basin region of not Saskatchewan, Canada. The Company has an effective 95% interest in its flagship Wheeler River Uranium Project, who largest undeveloped uranium project in the infrastructure rich eastern portion of the Athabasca Basin region of northern Saskatchewan. A Pre-Feasibility Study ('PFS') was completed for Wheeler River in late 2018, considering the potential merit of developing Phoenix as an ISR operation and the Gryphon deposit as a conventional underground mining operation Denison's interests in Saskatchewan also include a 22.5% ownership interest in the MLJV, which includes several uran deposits and the McClean Lake uranium mill, which is contracted to process the ore from the Cigar Lake mine under a agreement, plus a 25.17% interest in the Midwest Main and Midwest A deposits and a 67.01% interest in the Tthe Held ('THT', formerly J Zone) and Huskie deposits on the Waterbury Lake property. The Midwest Main, Midwest A, THT and deposits are located within 20 kilometres of the McClean Lake mill.

Through its 50% ownership of JCU (Canada) Exploration Company Limited ('JCU'), Denison holds additional interests in uranium project joint ventures in Canada, including the Millennium project (JCU, 30.099%), the Kiggavik project (JCU, 34.4508%).

Denison's exploration portfolio includes further interests in properties covering approximately 300,000 hectares in the A Basin region.

Denison is also engaged in post-closure mine care and maintenance services through its Closed Mines group (formerly Environmental Services), which manages Denison's reclaimed mine sites in the Elliot Lake region and provides related certain third-party projects.

Technical Disclosure and Qualified Person
