

# Genius Metals Partners with Clarity Gold to Advance its Lithium381 Property in James Bay

07.12.2022 | [CNW](#)

MONTRÉAL, Dec. 7, 2022 - [Genius Metals Inc.](#) (TSXV: GENI) ("Genius Metals" or the "Corporation") is pleased to announce it has signed on December 6<sup>th</sup>, 2022 an option agreement (the "Option Agreement") with Clarity Gold Corp. (CSE: CLAR), (OTC: CLGCF), (FSE: 27G) ("Clarity") which enables CLAR to acquire a 50% interest in the Corporation's Lithium381 property (the "Property") located in the James Bay-Eeyou Istchee region of the Province of Quebec. The Property is contiguous to Allkem Limited's (TSX: AKE) James Bay Lithium property which comprises the Allkem lithium deposit (40.8 Mt @1.40% Li<sub>2</sub>O as Indicated Resource) formerly known as the Cyr deposit (see figure 1).

## The Lithium381 Property

The Allkem spodumene-bearing granitic pegmatite dykes could extend to the Lithium381 property which has never been drill tested. The lithium mineralization on the Allkem property deposit is within the mineral spodumene and the granitic pegmatite dykes are classified as the rare earth elements type (Li-Cs-Ta). The Lithium381 property has never been explored for lithium mineralization. The Quebec government public records also indicate the presence of three spodumene-bearing pegmatite outcrops on southern neighbouring property. Other active claim holders in the immediate area include [Patriot Battery Metals Inc.](#) and a partnership between Osisko Development and [Brunswick Exploration Inc.](#)

Guy Goulet, CEO of Genius Metals mentioned: "Genius is pleased to partner with a group like Clarity that is willing to commit rapidly in exploring this prospective property. Following a preliminary assessment of the lithium potential in the immediate area, Genius has concluded there is a possibility that the Allkem's dykes could extend into our ground and a preliminary work program to test this possibility is warranted."

"This option agreement marks Clarity's step towards diversifying its mineral portfolio into the exciting lithium space." stated Clarity CEO James Rogers. "We are excited to begin exploring such a well-positioned project with favourable underlying geology"

Click on the following link to view Figure 1. Location of Lithium 381 Project showing nearby properties and total pit outline on Allkem's James Bay Lithium Project from the 2021 feasibility study.

The Lithium381 project consists of 21 mining claims totaling 1,108 ha (11.08km<sup>2</sup>) and lies within the Lower Eastmain River Greenstone Belt (LEGB) near the contact with the metasedimentary Nemiscau sub-province. The GB is composed of Archean komattitic to rhyolitic volcanosedimentary assemblages overlain by the Auclair metasedimentary Formation. Several plutons ranging from tonalitic to monzogranitic compositions intruded the volcanosedimentary rocks.

The property is located 3km from the KM381 facilities operated by the Société de Développement de la Baie-James (SDBJ) providing valuable services such as lodging, fuel, meals and mechanical services that enable year-long exploration on the property to be undertaken.

## Structure of the transaction

The Corporation has granted Clarity an exclusive option to acquire a 50% interest in the Property (the "Option") for a total consideration of (i) \$750,000 in expenditures which Clarity shall fund on or before December 31, 2024, inclusive of the deposit of \$25,000 provided by Clarity to the Corporation on November 25, 2022 and (ii) an aggregate of 720,000 common shares of Clarity ("Shares"), which will be subject to a voluntary escrow to be released as to 90,000 every four months commencing on the date that is four months after the Closing Date.

Upon the exercise of the Option, the Corporation and Clarity will form a joint venture to carry out further exploration activities and, if deemed viable, carry out development and mining activities on the Property. The

parties agree to pay their pro-rata share of exploration expenditures going forward. Failing to do so will result in their respective interest being diluted. Closing of the transaction remains conditional upon regulatory approvals, as applicable, and other conditions customary for transactions of this nature.
