Boise, December 13, 2023 - [Thunder Mountain Gold Inc.](#) (OTCQB: THMG) (TSXV: THM) (the "Company" or "THMG") announced today that it has purchased an additional 56 acres of strategic land at the Company's South Mountain Project.

The land is a combination of both patented and private land, with full mineral rights, and was previously leased by the Company. The parcel is contiguous with the South Mountain patented claims and is important to the future development of the Texas Zone. This land acquisition covers a gap in the main mine area and eliminates any outside ownership within the main mine area.

Regarding The South Mountain Project

The South Mountain Mine is a polymetallic development project focused on high-grade zinc, silver, gold, and copper, and is located approximately 70 miles southwest of Boise, Idaho (See Figure 2). The Project was intermittently mined from the late 1800s to the late 1960s (most notably by Anaconda Mining) and its existing underground workings remain intact and well maintained. [Thunder Mountain Gold Inc.](#) purchased and advanced the project from 2007 through 2022, with expenditures into the project of approximately US\$20 million. Historic production at the Project has largely come from high-grade massive sulfide bodies that remain open at depth and along strike. According to historical smelter records, approximately 53,642 tons of mineralized material has been mined to date. These records also indicate average grades; 14.5% Zn, 10.6 o.p.t. Ag (363.42 g/t Ag), 0.058 o.p.t. Au (1.98 g/t Au), 1.4% Cu, and 2.4% Pb were realized (See NI 43-101 Technical Report: Updated Mineral Resource Estimate for the South Mountain Project, dated June 15, 2021, Section 6.4 - Table 6-3 for more details. More information available on the [Thunder Mountain Gold Inc.](#) website and at www.sedar.com).
