Retains 3% Gross Sales Royalty on Kami Iron Ore Project

St. John's, Newfoundland and Labrador -- ([Marketwire](#)) -- 12/08/10 -- [Altius Minerals Corporation](#) ('Altius') (TSX VENTURE: ALS) reports that Alderon Resources Corp. (ADV: TSX-V) ('Alderon') has earned a 100% interest in Altius' Kamistatusset iron ore project ('Kami') by meeting all requirements of an option agreement between the companies. In conjunction with its transfer of title to the project Altius has received 32,285,006 shares of Alderon (representing approximately 45% of the issued Alderon common shares before dilution from Alderon's recently announced equity placement). Altius also retains a 3% gross sales royalty relating to any potential future mining operations. Altius has also nominated two candidates to Alderon's Board of Directors who will stand for election at its upcoming Annual General Meeting on December 10, 2010.

The Kami project hosts several zones of iron mineralization and is located within an area of active iron ore mining in western Labrador in the province of Newfoundland and Labrador, Canada. Alderon recently announced that it is near completion of a 25,000 metre diamond drilling program and that it anticipates the calculation of an initial National Instrument 43-101 compliant resource estimate in the first quarter of 2011. Alderon has also released plans for a 5,000 metre 2011 winter drilling campaign in order to prepare for potential expansion of the initial resource estimate.

Altius' President and CEO, Brian Dalton commented 'The drilling results published thus far from Alderon's 2010 drilling program have either met or exceeded our expectations. The Kami project is very well located within the core of the Labrador West iron ore mining district and we look forward to its rapid advancement under the guidance of the Alderon management team, which has a successful collective development and operating track record in the region.'
