2. Olive defines Liquid Investments as investments whose position can be liquidated in less than one day's average trading volume for that security.

Samuel Pelaez, the Company's President, CEO, CIO and Director, stated: "The month of February was mixed for commodities and major commodity producers. Oil and associated equities performed well, while copper and its associated equities declined. Junior resource stocks predominantly dropped for the month, widening the valuation gaps with their larger counterparts. At Olive, we initiated a measured approach to deploy capital into the junior resource space as price declines in the sector appear too excessive on a relative basis."

Derek Macpherson, Executive Chairman, stated: "Olive's NAV was up a modest 2.0% month over month, ahead of the XGD Gold ETF (down 5.6%) and the TSXv Materials Index (down 2.7%). Our patient accumulation of quality gold stocks had Olive well positioned to capitalize when the gold price hit a new all-time high, earlier this month. In particular, Olive has had strong performance from our positions in Mawson Gold (up 73%) and K92 Mining (up 20%) since the end of February. Additionally, we are seeing positive surprises from recent corporate actions with our position in Aurion Gold (up 22%) and Karora Resources (up 12%) since the end of February."

## Normal Course Issuer Bid ("NCIB")

During the month of February, the Company repurchased 500,000 common shares at a price of \$0.025 per share pursuant to its NCIB. As of the date of this release, the Company currently holds 500,000 shares in treasury pending cancellation.

As of the date of this release [Olive Resource Capital Inc.](#) has 109,174,709 common shares outstanding.

## Use of Non-GAAP Financial Measures:

This press release contains references to NAV or "net asset value per share" which is a non-GAAP financial

measure. NAV is calculated as the value of total assets less the value of total liabilities divided by the total number of common shares outstanding as at a specific date. The term NAV does not have any standardized meaning according to GAAP and therefore may not be comparable to similar measures presented by other companies. There is no comparable GAAP financial measure presented in the Company's consolidated financial statements and thus no applicable quantitative reconciliation for such non-GAAP financial measure. The Company believes that the measure provides information useful to its shareholders in understanding the Company's performance, and may assist in the evaluation of the Company's business relative to that of its peers. This data is furnished to provide additional information and does not have any standardized meaning prescribed by GAAP. Accordingly, it should not be considered in isolation or as a substitute for measures of performance prepared in accordance with GAAP, and is not necessarily indicative of other metrics presented in accordance with GAAP. Existing NAV of the Company is not necessarily predictive of the Company's future performance or the NAV of the Company as at any future date.
