

West High Yield (W.H.Y.) Resources Ltd. Announces Frankfurt Stock Exchange Listing

25.04.2024 | [Newsfile](#)

Calgary, April 25, 2024 - [West High Yield \(W.H.Y.\) Resources Ltd.](#) (TSXV: WHY) (the "Company" or "West High Yield") is pleased to announce the listing of the Company's common shares on the Frankfurt Stock Exchange (the "FSE") under the trading symbol "W0H". The Company's common shares are now cross listed on the TSX Venture Exchange (the "TSXV") in Canada and the FSE in Germany, aligned with the Company's strategy of introducing European investors and manufacturers to the advanced stage development of its Record Ridge Industrial Mineral Mine that contains 10.6 million tonnes of magnesium and 16 million tonnes of silica.

Frank Marasco Jr., President and CEO of West High Yield, commented: "We expect the FSE listing will assist in increasing trading liquidity and also facilitate potential investment in the Company by institutional and retail investors across Europe. The listing on the FSE, in addition to the Canadian TSXV, will heighten exposure of the Company in this major marketplace with its knowledgeable investor base traditionally very active in the junior gold mining sector."

The FSE is one of the world's largest international trading centers (behind only the NASDAQ and NYSE) organized exchange-trading market in terms of turnover and dealings in securities. The electronic trading platform of the FSE, XETRA, has made it the world's second largest fully electronic cash market responsible for approximately 90 percent of all securities traded in Germany with direct linkage to all other major European financial hubs. This European listing will help to increase the Company's trading liquidity and facilitate investment in West High Yield by European investors through the Frankfurt listing as major financial hubs like Switzerland, Luxembourg, Lichtenstein, Monaco and others are reached easily.

About West High Yield

West High Yield is a publicly traded junior mining exploration and development company focused on acquiring, exploring, and developing mineral resource properties in Canada. Its primary objective is to develop its Record Ridge critical mineral magnesium, silica, and nickel deposits using green processing techniques to minimize waste and CO₂ emissions.

The Company's Record Ridge magnesium deposit located 10 kilometers southwest of Rossland, British Columbia has approximately 10.6 million tonnes of contained magnesium based on an independently produced National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") Preliminary Economic Assessment technical report prepared by SRK Consulting (Canada) Inc. in accordance with NI 43-101.
