

Loncor Applies to Extend the Expiry Dates of Certain Warrants

24.05.2024 | [CNW](#)

TORONTO, May 24, 2024 - [Loncor Gold Inc.](#) ("Loncor" or the "Company") (TSX: LN) (OTCQX: LONCF) (FSE: LO51) announces that it has applied to the Toronto Stock Exchange ("TSX") to extend the expiry dates of a total of 3,375,000 outstanding common share purchase warrants of the Company (the "Warrants"). The Warrants were issued as part of a private placement of securities of the Company which closed in June 2022. Each of these Warrants has an exercise price of Cdn\$0.75 per share. Currently, 350,000 of these Warrants have an expiry date of June 8, 2024 and the remaining 3,025,000 of such Warrants have an expiry date of June 10, 2024. The Company has applied to the TSX to extend both such expiry dates to June 10, 2025. No insiders of the Company hold any of these Warrants, directly or indirectly. Finalization of this extension is subject to the approval of the TSX. If such approval is obtained, this extension will be effective ten business days from the date of this press release.

About [Loncor Gold Inc.](#)

Loncor is a Canadian gold exploration company focussed on the Ngayu Greenstone Gold Belt in the northeast of the Democratic Republic of the Congo (the "DRC"). The Loncor team has over two decades of experience of operating in the DRC. Loncor's growing resource base in the Ngayu Belt currently comprises the Imbo and Makapela Projects. At the Imbo Project, the Adumbi deposit holds an indicated mineral resource of 1.88 million ounces of gold (28.185 million tonnes grading 2.08 g/t gold), and the Adumbi deposit and two neighbouring deposits hold an inferred mineral resource of 2.090 million ounces of gold (22.508 million tonnes grading 2.89 g/t Au), with 84.68% of these resources being attributable to Loncor. Following a drilling program carried out by the Company at the Adumbi deposit in 2020 and 2021, the Company completed a Preliminary Economic Assessment ("PEA") of the Adumbi deposit and announced the results of the PEA in December 2021. The Makapela Project (which is located approximately 50 kilometres from the Imbo Project) has an indicated mineral resource of 614,200 ounces of gold (2.20 million tonnes grading 8.66 g/t Au) and an inferred mineral resource of 549,600 ounces of gold (3.22 million tonnes grading 5.30 g/t Au). On December 13, 2023, Loncor announced the sale of the Makapela Project, which sale is expected to be completed during the second quarter of 2024.

Additional information with respect to Loncor and its projects can be found on Loncor's website at www.loncor.com.

Cautionary Note to U.S. Readers

National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101") is a rule of the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Unless otherwise indicated, all scientific and technical information concerning Loncor's mineral properties contained in this press release has been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Classification System. These standards differ from the requirements of the U.S. Securities and Exchange Commission (the "SEC"), and scientific and technical information concerning Loncor's mineral properties contained in this press release may not be comparable to similar information disclosed by U.S. companies. U.S. investors are urged to consider closely all of the disclosure in the Company's Form 20-F Annual Report (File No. 001- 35124) and other reports filed pursuant to the United States Securities Exchange Act of 1934, as amended, which may be secured from the Company, or from the SEC's website at <http://www.sec.gov/edgar.shtml>.

Cautionary Note Concerning Forward-Looking Information

This press release contains forward-looking information. All statements, other than statements of historical fact, that address activities, events or developments that the Company believes, expects or anticipates will or may occur in the future (including, without limitation, statements regarding mineral resource estimates and the proposed extension of the expiry dates of the Warrants) are forward-looking information. This forward-looking information reflects the current expectations or beliefs of the Company based on information currently available to the Company. Forward-looking information is subject to a number of risks and uncertainties that may cause the actual results of the Company to differ materially from those discussed in

the forward-looking information, and even if such actual results are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on the Company. Factors that could cause actual results or events to differ materially from current expectations include, among other things, the possibility that the TSX does not approve the proposed extension of the expiry dates of the Warrants, the possibility that future exploration (including drilling) or development results will not be consistent with the Company's expectations, risks related to the exploration stage of the Company's properties, uncertainties relating to the availability and costs of financing needed in the future, failure to establish estimated mineral resources (the Company's mineral resource figures are estimates and no assurances can be given that the indicated levels of gold will be produced), changes in world gold markets or equity markets, political developments in the DRC, gold recoveries being less than those indicated by the metallurgical testwork carried out to date (there can be no assurance that gold recoveries in small scale laboratory tests will be duplicated in large tests under on-site conditions or during production), fluctuations in currency exchange rates, inflation, changes to regulations affecting the Company's activities, delays in obtaining or failure to obtain required project approvals, the uncertainties involved in interpreting drilling results and other geological data and the other risks disclosed under the heading "Risk Factors" and elsewhere in the Company's annual information form dated April 1, 2024 filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov. Forward-looking information speaks only as of the date on which it is provided and, except as may be required by applicable securities laws, the Company disclaims any intent or obligation to update any forward-looking information, whether as a result of new information, future events or results or otherwise. Although the Company believes that the assumptions inherent in the forward-looking information are reasonable, forward-looking information is not a guarantee of future performance and accordingly undue reliance should not be put on such information due to the inherent uncertainty therein.
