Unaudited interim results for the three-and nine-month periods ended 30 September 2024

Serabi (AIM:SRB, TSX:SBI, OTCQX:SRBIF), the Brazilian focused gold mining and development company, is pleased to release its unaudited interim results for the three and nine-month periods ended 30 September 2024.

A copy of the full interim statements together with commentary can be accessed on the Company's website using the following link:- <https://bit.ly/3Z8CJiX>

*"This has been another excellent quarter for Serabi, in particular for cash generation, said Clive Line, Serabi's CFO. "The cash balance at the end of September was \$20.0 million with \$8.0 million generated during the quarter. EBITDA of \$11.7 million for the quarter brings EBITDA for the year to date to a total of \$24.7 million, a 42 per cent improvement compared with the second quarter.*

*"We benefited from inventory realisation to the sum of approximately \$3.0M, boosting quarter sales, and whilst I do not expect similar additional inventory sales for Q4, I do anticipate cash growth to continue to the end of the year notwithstanding the cyclical effects of tax payments and 13<sup>th</sup> salary accruals that are due. The ability of the business to produce healthy cash flow is being further supported by the Coringa classification plant which is now operational and in the final stages of commissioning. We are already passing run of mine ore through this plant and will also start to work our way through the lower grade stockpiles that have been accumulated at Coringa. As a result of processing this stockpiled material we hope that this final quarter will continue the pattern of increasing production quarter on quarter that we have so far experienced in 2024.*

*"During the quarter we announced the results of the Preliminary Economic Assessment for Coringa which indicate an average project AISC of \$1,241 over the project life from 1 January 2025 onwards. The full NI 43-101 compliant Technical Report was published on 21 November 2024."*

Financial Highlights (all currency amounts are expressed in US Dollars unless otherwise stated)

- Gold production for the first nine months of 2024 of 27,499 ounces (2023: 25,262 ounces).
- Cash held on 30 September 2024 of \$20.0 million (31 December 2023: \$11.6 million including US\$0.6 million relating to the exploration alliance with Vale).
- EBITDA for the nine-month period of \$24.7 million (2023: \$8.8 million).
- Post-tax profit for the nine-month period of \$17.8 million (2023: \$4.6 million),
- Profit per share of 23.55 cents compared with a profit per share of 6.10 cents for the same nine month period of 2023.
- Net cash inflow from operations for the nine-month period (after mine development expenditure of US\$4.9 million) of US\$18.2 million (2023: US\$10.7 million inflow, after mine development expenditure of US\$2.6 million).
- Average gold price of US\$2,338 per ounce received on gold sales during the nine month period (2023: US\$1,940).
- Cash Cost for the nine month period to 30 September 2024 of US\$1,405 per ounce (nine months 2023: US\$1,253 per ounce).
- All-In Sustaining Cost for the nine-month period to 30 September 2024 of US\$1,790 per ounce (nine months 2023: US\$1,553 per ounce).

Overview of the financial results

In the first nine months of 2024, the Group has reported revenue and operating costs related to the sale of 28,912 ounces in the period (27,499 ounces produced). This compares to sales reported of only 23,733 ounces in the first nine months of 2023. Reported revenues and costs reflect the ounces sold in each period and as a result total costs for the nine-month period are significantly higher than for the corresponding period of 2023.

During the month of January 2024, the Group also completed and drew down a new US\$5 million loan with Itaú Bank in Brazil. This new arrangement has an interest coupon of 8.47 per cent and is repayable as a bullet payment on 6 January 2025. This replaced a similar loan arranged with Santander Bank in Brazil that was repaid during the month of February 2024.

Final commissioning of the ore sorter and crushing plant for Coringa is almost complete, with the crushing plant operational during October and the ore-sorter starting up during November. During the remainder of the fourth quarter in addition to passing run of mine ore extracted from Coringa, the Company will also be processing some of the lower grade material that has been stockpiled at Coringa providing an additional boost to gold production in the remainder of the fourth quarter.

### Forward-looking statements

Certain statements in this announcement are, or may be deemed to be, forward looking statements. Forward looking statements are identified by their use of terms and phrases such as "believe", "could", "should", "envisage", "estimate", "intend", "may", "plan", "will" or the negative of those, variations or comparable expressions, including references to assumptions. These forward-looking statements are not based on historical facts but rather on the Directors' current expectations and assumptions regarding the Company's future growth, results of operations, performance, future capital and other expenditures (including the amount, nature and sources of funding thereof), competitive advantages, business prospects and opportunities. Such forward looking statements reflect the Directors' current beliefs and assumptions and are based on information currently available to the Directors. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking statements including risks associated with vulnerability to general economic and business conditions, competition, environmental and other regulatory changes, actions by governmental authorities, the availability of capital markets, reliance on key personnel, uninsured and underinsured losses and other factors, many of which are beyond the control of the Company. Although any forward-looking statements contained in this announcement are based upon what the Directors believe to be reasonable assumptions, the Company cannot assure investors that actual results will be consistent with such forward looking statements.

### Qualified Persons Statement

The scientific and technical information contained within this announcement has been reviewed and approved by Michael Hodgson, a Director of the Company. Mr Hodgson is an Economic Geologist by training with over 35 years' experience in the mining industry. He holds a BSc (Hons) Geology, University of London, a MSc Mining Geology, University of Leicester and is a Fellow of the Institute of Materials, Minerals and Mining and a Chartered Engineer of the Engineering Council of UK, recognizing him as both a Qualified Person for the purposes of Canadian National Instrument 43-101 and by the AIM Guidance Note on Mining and Oil & Gas Companies dated June 2009.

### 1. Basis of preparation

#### 1. Basis of preparation

These interim condensed consolidated financial statements are for the three and nine month periods ended 30 September 2024. Comparative information has been provided for the unaudited three and nine month periods ended 30 September 2023 and, where applicable, the audited twelve month period from 1 January 2023 to 31 December 2023. These condensed consolidated financial statements do not include all the disclosures that would otherwise be required in a complete set of financial statements and should be read in conjunction with the 2023 annual report.

The condensed consolidated financial statements for the periods have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" and the accounting policies are consistent with those of the annual financial statements for the year ended 31 December 2023 and those

envisaged for the financial statements for the year ending 31 December 2024.

The interim financial information has not been audited and does not constitute statutory accounts as defined in Section 434 of the Companies Act 2006. Whilst the financial information included in this announcement has been compiled in accordance with International Financial Reporting Standards ("IFRS") this announcement itself does not contain sufficient financial information to comply with IFRS. The Group statutory accounts for the year ended 31 December 2023 prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 have been filed with the Registrar of Companies. The auditor's report on these accounts was unqualified. The auditor's report did not contain a statement under Section 498 (2) or 498 (3) of the Companies Act 2006.

Accounting standards, amendments and interpretations effective in 2024

The Group has not adopted any standards or interpretations in advance of the required implementation dates.

The following Accounting Standards have not yet been ratified in UK law but are expected to be ratified during 2024. The Group expects to make appropriate compliant disclosures in its Annual Report for the year ended 31 December 2024.

*IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information*

*IFRS S2 Climate-related Disclosures*

*Amendments IAS 1 - Classification of Liabilities as Current or Non-Current and Non Current Liabilities with Covenants*

The IASB issued amendments to IAS 1 Presentation of Financial Statements ("IAS 1"). The amendments clarify that the classification of liabilities as current or non-current is based on rights that are in existence at the end of the reporting period. Classification is unaffected by the entity's expectation or events after the reporting date. Covenants of loan arrangements will affect the classification of a liability as current or non-current if the entity must comply with a covenant either before or at the reporting date, even if the covenant is only tested for compliance after the reporting date. There was no significant impact on the Company's consolidated interim financial statements as a result of the adoption of these amendments.

Management do not consider that the following other amendments to existing standards are applicable to the current operations of the Group or will have any material impact on the financial statements.

*Lease Liability in a Sale and Leaseback (amendments to IFRS 16)*

*Supplier Finance Arrangements (amendments to IAS 7 and IFRS 17)*

Certain new accounting standards and interpretations have been published that are not mandatory for the current period and have not been early adopted. These standards are not expected to have a material impact on the Company's current or future reporting periods.

These financial statements do not constitute statutory accounts as defined in Section 434 of the Companies Act 2006.

(i) Going concern

On 30 September 2024 the Group held cash of US\$20.03 million which represents an increase of US\$8.45 million compared to 31 December 2023.

On 7 January 2024, the Group completed a US\$5.0 million unsecured loan arrangement with Itaú Bank in Brazil. The loan is repayable as a bullet payment on 6 January 2025 and carries an interest coupon of 8.47 per cent. The proceeds raised from the loan are being used for working capital and secure adequate liquidity to repay a similar arrangement which was repaid on 22 February 2024.

Management prepares, for Board review, regular updates of its operational plans and cash flow forecasts

based on their best judgement of the expected operational performance of the Group and using economic assumptions that the Directors consider are reasonable in the current global economic climate. The current plans assume that during 2024 the Group will continue gold production from its Palito Complex operation as well as increase production from the Coringa mine and will be able to increase gold production to exceed the levels of 2023.

The Directors will limit the Group's discretionary expenditures, when necessary, to manage the Group's liquidity.

The Directors acknowledge that the Group remains subject to operational and economic risks and any unplanned interruption or reduction in gold production or unforeseen changes in economic assumptions may adversely affect the level of free cash flow that the Group can generate on a monthly basis. The Directors have a reasonable expectation that, after taking into account reasonably possible changes in trading performance, and the current macroeconomic situation, the Group has adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the Financial Statements.

## 2. Depreciation and amortisation

Whilst the Coringa Gold Project has been in production for some time, it is still in a development and ramp-up stage and has not yet attained the operational scale that the Board considers is required to be considered in Commercial Production. As a result no amortisation charge in respect of the underlying mine asset costs has been reflected in the financial statements to date.

## 3. Other Income and Expenses

Under the copper exploration alliance with Vale announced on 10 May 2023, the related exploration activities undertaken by the Group under the management of a working committee (comprising representatives from Vale and Serabi), were funded in their entirety by Vale during Phase 1 of the programme. Following the completion of Phase 1, Vale advised the Group, in April 2024, that it did not wish to continue the exploration alliance.

Exploration and development of copper deposits is not the core activity of the Group and further funding beyond the Phase 1 commitment would be required before a judgment could be made as to a project being commercially viable. There is a significant cost involved in developing new copper deposits and it is unlikely that, without the financial support of a partner, the Group would independently seek to develop a copper project in preference to any of its existing gold projects and discoveries. As a result, both the funding received from Vale and the related exploration expenditures has been recognised through the income statement. As this is not a principal business activity of the Group these receipts and expenditures are classified as other income and other expenses.

## 5. Taxation

The Group has recognised a deferred tax asset to the extent that the Group has reasonable certainty as to the level and timing of future profits that might be generated and against which the asset may be recovered. The deferred tax liability arising on unrealised exchange gains has been eliminated in the nine-month period to 30 September 2024 reflecting the movement in the Brazilian Real exchange rate at the end of the period and resulting in deferred tax income of US\$946,220 (nine months to 30 September 2023 - income of US\$23,113).

The Group has also incurred a tax charge in Brazil for the six-month period of US\$3,783,403 (nine months to 30 September 2023 tax charge - US\$1,207,583).
