

Snow Lake Secures Strategic Stake in Uranium Development Project in Wyoming's Powder River Basin

01.07.2025 | [Newsfile](#)

Winnipeg, July 1, 2025 - [Snow Lake Resources Ltd.](#), d/b/a Snow Lake Energy (NASDAQ: LITM) ("Snow Lake"), a uranium exploration and development company, announces a cornerstone investment in GTi Energy Ltd. ("GTi Energy"), to advance its Lo Herma uranium project ("Lo Herma") through the next phase of drilling and fieldwork, aimed at expanding and upgrading Lo Herma's mineral resource base.

Highlights

- Snow Lake will invest AUD\$1.4million in GTi Energy's AUD\$4.5 million equity financing (the "Financing") to support advancement of its Lo Herma ISR amenable uranium project
- GTi Energy owns 100% of the Lo Herma uranium project, located in the Powder River Basin in Wyoming, the leading uranium producing state in the U.S.
- GTi Energy recently completed a positive scoping study (the "Scoping Study") on Lo Herma in accordance with JORC (2012)¹, which is a preliminary technical and economic assessment of the potential viability of Lo Herma. For more information on the scoping study, see GTi Energy's ASX Announcement dated June 5, 2025²
- The Scoping Study contemplated an ISR operation with a central processing plant, a JORC (2012) resource estimate of 8.7Mlbs U₃O₈, a 7-year mine life, an annual production target of 800,000 lbs U₃O₈, with an NPV of A\$100 million and a pre-tax IRR of 56%
- Lo Herma is one of the more advanced development stage uranium projects in the Powder River Basin, and further development holds the potential to increase the uranium production profile of the Powder River Basin in Wyoming
- The Financing provides GTi Energy with the financial runway to advance Lo Herma through the next phase of drilling and fieldwork, aimed at expanding and upgrading the project's mineral resource base
- Lo Herma is contiguous to the southern border of the Pine Ridge Uranium Project, a 50/50 joint venture between Snow Lake and [Global Uranium and Enrichment Ltd.](#)
- Snow Lake's investment in GTi Energy continues a business strategy to make investments in public companies with projects across the spectrum of critical minerals that demonstrate potential to be developed into commercial operations

CEO Remarks

"Our investment in GTi Energy's equity financing is the most recent example of our strategy to invest in companies with critical minerals projects across the spectrum of critical minerals, including uranium, lithium, rare earths, cesium, and antimony," said Frank Wheatley, CEO of Snow Lake.

Mr. Wheatley continued: "With GTi Energy's Lo Herma uranium project located in the prolific Powder River Basin in Wyoming, with a positive scoping study recently released, and against the backdrop of the U.S. Administration's policies underpinning the expansion of nuclear energy in the U.S., we view our investment in GTi Energy as timely, as GTi Energy embarks on a development program to expand its mineral resources at Lo Herma."

Financing

GTi Energy intends to raise a total of AUD\$4.5 million, in two tranches, before costs of the Financing. An initial tranche is anticipated to close on July 9, 2025, with the second tranche scheduled to close following shareholder approval at a shareholder meeting to be scheduled. Proceeds from the Financing will principally be used for mineral resource expansion and infill drilling at Lo Herma, as well as for further hydrogeological and metallurgical analysis, landholding costs, general working capital and costs of the offer.

Snow Lake will be granted the right to appoint one member to the GTi Energy Board of Directors, subject to completion of the Financing. Snow Lake's participation in the Financing remains subject to completing its final due diligence on GTi Energy and its assets, before the date of the shareholder meeting.

About Snow Lake Resources Ltd.

Snow Lake Resources Ltd., d/b/a Snow Lake Energy, is a Canadian mineral exploration company listed on Nasdaq:LITM, with a global portfolio of critical mineral and clean energy projects. The Pine Ridge Uranium project is an exploration stage project located in Wyoming, United States, and the Engo Valley Uranium Project is an exploration stage project located in the Skeleton Coast of Namibia. Snow Lake also holds a portfolio of additional exploration stage critical minerals projects located in Manitoba, as well as investments in a number of public companies with critical minerals assets.
