

ESGold Corp. Pioneering Innovative Mining Approach, Demonstrating Next-Gen Processing Capabilities

28.08.2025 | [GlobeNewswire](#)

[ESGold Corp.](#) (CSE: ESAU) (OTCQB: ESAUF) today announces its placement in an editorial published by NetworkNewsWire ("NNW"), one of 70+ brands within the Dynamic Brand Portfolio@IBN (InvestorBrandNetwork), a specialized communications platform with a focus on financial news and content distribution for private and public companies and the investment community.

Across Colombia's legendary gold-producing regions, generations of traditional mining operations have accumulated enormous volumes of tailings, material that earlier technologies deemed worthless but which actually harbors substantial reserves of precious metals. These historical deposits now present a dual opportunity to both remedy long-standing environmental concerns while also accessing previously unrecoverable gold and silver through cutting-edge extraction methods.

ESGold Corp. is pioneering this innovative approach, where its recently unveiled, fully permitted joint venture in Bolívar demonstrates how next-generation processing capabilities can convert abandoned mining waste into profitable, sustainable operations. Through environmentally conscious practices, ESGold is simultaneously extracting valuable resources and transforming decades-old ecological burdens into engines of responsible economic development.

About ESGold Corp.

ESGold Corp. (CSE: ESAU) (OTCQB: ESAUF) is a fully permitted, preproduction resource company at the forefront of clean mining and exploration innovation. With proven expertise in Quebec, the company is advancing its projects toward production and feasibility while delivering long-term value through sustainable resource recovery and exploration. ESGold's flagship Montauban property, located 80 kilometers west of Quebec City, serves as a model for responsible mining practices, combining near-term production with district-scale discovery potential.
