# Lithium Corporation Strengthens Rare Earths Position with Approved Claims

02.10.2025 | ACCESS Newswire

ELKO, October 2, 2025 - Lithium Corp. (OTCQB:LTUM) ("the Company"), a mineral exploration company committed to advancing North America's energy independence through fostering domestic critical mineral resource exploration and production, is pleased to announce field work during the 2024 and 2025 seasons discovered several discrete areas of enriched Neodymium/Dysprosium and other Rare Earth Element mineralization at its Fluorspar exploration property in southern British Columbia, Canada. Accordingly, the claim blocks in these areas have been realigned to optimize coverage of these features. The Company is conducting fieldwork here to determine the bedrock source of this mineralization noted only in sediments to date.

Lithium Corp. currently has approximately 5,732 acres (2,319 hectares) of claims in this area and is looking at possibly expanding the block to encompass other geologically analogous situations nearby. This discovery is significant, as Neodymium and Dysprosium are highly desired elements for the production of high-efficiency electric motors, and it comes at a time of accelerating government and industry focus on domestic critical mineral development. In July 2025, the U.S. Department of Defense assumed an equity stake in MP Materials in an effort to dramatically accelerate the build-out of an end-to-end U.S. rare earth magnet supply chain to reduce foreign dependency. Lithium Corporation's exploration activities are directly aligned with these national objectives.

About Lithium Corporation
Lithium Corporation is a mineral exploration company dedicated to securing North America's energy independence through domestic critical mineral resources. As one of the few Project Generators in North America's critical minerals sector, the Company leverages its extensive exploration expertise to focus on energy metals with the goal of helping achieve energy independence for North America.

The Company's dual operational focus spans two worldclass mining jurisdictions with promising lithium prospects in Nevada, USA, and a diverse portfolio of titanium, rare earth elements, graphite, fluorspar, and antimony properties in British Columbia, Canada. Lithium Corporation is committed to driving a secure and independent energy future for North America through strategic investments in energy metals exploration and related opportunities, such as renewable energy generation and energy storage solutions.

Notice Regarding Forward-Looking Statements
This current report contains "forward-looking statements," as that term is defined in Section 27A of the United States Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Statements in this press release which are not purely historical are forward-looking statements and include any statements

regarding beliefs, plans, expectations or intentions regarding the future.

Actual results could differ from those projected in any forward-looking statements due to numerous factors. Such factors include, among others, the inherent uncertainties associated with mineral exploration and difficulties associated with obtaining financing on acceptable terms. We are not in control of minerals prices and these could vary to make development uneconomic. These forward-looking statements are made as of the date of this news release, and we assume no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although we believe that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can be no assurance that such beliefs, plans, expectations or intentions will prove to be accurate. Investors should consult all of the information set forth herein and should also refer to the risk factors disclosure outlined in our most recent annual report for our last fiscal year, our quarterly reports, and other periodic reports filed from time-to-time with the Securities and Exchange Commission.
