VERIFIED FORUM FOR MANAGEMENT AND SHAREHOLDERS

AGORACOM Verified Forums for civil engagement between shareholders and management completes the engagement cycle by providing stakeholders with a community that provides full transparency, communications efficiency for companies and FUD protection from nefarious investors who use misinformation and disinformation to hurt companies.

George Tsiolis, Founder of AGORACOM stated "By combining insanely great AI content with verified forums, we are solving two major problems for small cap public companies who want to communicate and engage in a manner that is consistent with the biggest companies in the world. With artificial intelligence accelerating at exponential rates, small cap companies would have been left behind due to their lack of resources - but AGORACOM AI combined with verified forums now puts small cap companies back in firm control of their messaging and engagement."

About LaFleur Minerals Inc.

LaFleur Minerals Inc. (CSE: LFLR) (OTCQB: LFLRF) (FSE: 3WK0) is focused on the development of district-scale gold projects in the Abitibi Gold Belt near Val-d'Or, Québec. Our mission is to advance mining projects with a laser focus on our resource-stage Swanson Gold Project and the Beacon Gold Mill, which have significant potential to deliver long-term value. The Swanson Gold Project is approximately 18,304 hectares (183 km²) in size and includes several prospects rich in gold and critical metals previously held by Monarch Mining, Abcourt Mines, and Globex Mining. LaFleur has recently consolidated a large land package along a major structural break that hosts the Swanson, Bartec, and Jolin gold deposits and several other showings which make up the Swanson Gold Project. The Swanson Gold Project is easily accessible by road allowing direct access to several nearby gold mills, further enhancing its development potential. LaFleur Minerals' fully-refurbished and permitted Beacon Gold Mill is capable of processing over 750 tonnes per day and is being considered for processing mineralized material at Swanson and for custom milling operations for other nearby gold projects.
