[Abitibi Metals Corp.](#) (CSE: AMQ) (OTCQB: AMQFF) (FSE: FW0) ("Abitibi" or the "Company") is pleased to announce the appointment of Mr. Craig Parry to the Company's Advisory Committee.

Mr. Parry is a highly accomplished mining executive and geologist with a proven track record of founding, leading, and financing successful resource companies. He currently serves as Lead Director of Skeena Resources, Executive Chairman and CEO of Vizsla Copper, and Chairman of Vizsla Silver. Over his career, he has held key roles with IsoEnergy, NexGen Energy, EMR Capital, Tigers Realm Coal, and Rio Tinto. Mr. Parry has been instrumental in several major discoveries, including Vizsla's Panuco-Copala silver veins, IsoEnergy's Hurricane deposit, and NexGen's Arrow deposit.

Jonathon Deluce, CEO of Abitibi Metals, stated, "We are thrilled to welcome Craig Parry, a true industry legend and a shareholder to the Abitibi Metals Advisory Committee. Craig's record of world-class discoveries and building multi-billion-dollar mining companies speaks for itself. His technical insight and strategic vision come at a pivotal time for Abitibi as we advance one of Québec's most exciting copper-gold growth stories. With our high-grade resource open for expansion and an aggressive drill program currently underway, Craig's experience will be invaluable in unlocking the full potential of the B26 Deposit."

Under Mr. Parry's leadership, Vizsla Silver has evolved into one of the top-performing silver developers in the Americas, successfully delineating a large high-grade silver-gold resource at its Panuco-Copala district in Mexico and delivering strong shareholder returns.

Mr. Parry graduated from The University of New South Wales and holds a Bachelor of Science (Applied Geology) with first class Honours and the University Medal.

"I'm thrilled to join Abitibi Metals as the company enters this exciting next phase of growth," commented Mr. Parry. "As a shareholder for several years, I've watched the team make tremendous progress advancing the B26 Project, which has all the hallmarks of a world-class copper-gold discovery - scale, grade, and room to grow."

Forward-looking statement:

This news release contains certain statements, which may constitute "forward-looking information" within the meaning of applicable securities laws. Forward-looking information involves statements that are not based on historical information but rather relate to future operations, strategies, financial results or other developments on the B26 Project or otherwise. Forward-looking information is necessarily based upon estimates and assumptions, which are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond the Company's control and many of which, regarding future business decisions, are subject to change. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward-looking statements made by or on the Company's behalf. Although Abitibi has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. All factors should be considered carefully, and readers should not place undue reliance on Abitibi's forward-looking information. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "expects," "estimates," "anticipates," or variations of such words and phrases (including negative and grammatical variations) or statements that certain actions, events or results "may," "could," "might" or "occur. Mineral exploration and development are highly speculative and are characterized by a number of significant inherent risks, which may result in the inability of the Company to successfully develop current or proposed projects for commercial, technical, political, regulatory or financial reasons, or if successfully developed, may not remain economically viable for their mine life owing to any of the foregoing reasons, among others. There is no assurance that the Company will be successful in achieving commercial mineral production and the likelihood of success must be considered in light of the stage of operations.
