

# Caprock Announces Commencement of Drill Program at Destiny

11.11.2025 | [Newsfile](#)

Toronto, November 11, 2025 - [Caprock Mining Corp.](#) (CSE:CAPR) ("Caprock" or the "Company") is pleased to announce that following the receipt of 'Permis d'intervention' (the "Intervention Permit") from the Quebec government's Ministry of Natural Resources and Forests, the Company has commenced its much anticipated drill program targeting deep-seated high-grade mineralization at its flagship Destiny gold property ("Destiny" or the "Project" or the "Property") located near Val d'Or, Quebec.

Caprock's President & CEO, Mr. Vishal Gupta, stated, "Drill holes DES-01-60 and DES-01-59 drilled at Destiny by a previous operator produced intercepts with grades as high as 26.6 g/t Au and 17.5 g/t Au, respectively. These drill holes intersected high-grade mineralization at approximately 550 metres below surface, and 200 - 250 metres below the floor of the conceptual open pit at DAC that was used for the generation of the current Mineral Resource Estimate (MRE). Furthermore, these two holes are over 200 metres laterally apart from each other. While analyzing the above information and the spatial distribution of the high-grade intercepts, Caprock's technical team has identified a sizeable zone that has the potential to host high-grade underground mineable gold mineralization. The four drill holes that comprise our current drill program have been specifically designed to establish continuity of this high-grade mineralized zone."

Mr. Gupta goes on to say, "This drill program is expected to be completed by mid-December, with all corresponding assays to be published by early February, 2026. A successful program will not only demonstrate the presence and continuity of high-grade mineralization beyond the near-surface, pit-constrained MRE published earlier this year, but also validate the geological model developed by our technical team that will help refine our drill targets for future campaigns."

## Details of the MRE at Destiny

The open pit-constrained MRE issued on March 24, 2025 for Destiny contains the following gold inventory:

Classification Constraints		Cut-Off Grade (Au g/t)	Tonnage	Grade (Au g/t)	Contained Gold Oz
Indicated	OP	0.30	6,752,000	0.91	196,549
Inferred	OP	0.30	28,560,000	0.87	794,886

## Mineral Resource Statement Notes:

1. CIM definition standards were followed for the resource estimate.
2. The 2025 resource model used ordinary kriging (OK) grade estimation within a three-dimensional block model with mineralized domains defined by wireframed solids.
3. Mineral resources are constrained within pit shells (OP).
4. An exchange rate of 1.35 is utilized in calculations (\$CAD/\$USD).
5. Open pit cut-off of 0.30 g/t Au milled is based on the cost/ton (\$CAD/t) milled for incremental mining, processing, and G&A based on the following:
  1. Long term metal prices of US\$2,100/oz of gold;
  2. Metallurgical recoveries are based on metallurgical testing recovery of 94%;
  3. Average Bulk density (specific gravity) was determined for each lithology and/or mineralized domain within the deposit;
  4. Total ore-based cost of CAD\$22.50/t;
  5. Processing costs of CAD\$18.00/t and G&A costs of CAD\$4.50/t milled;
  6. Dilution of 10%; and
  7. Pit Slope angle of 45 degrees.
6. Mineral Resources that are not mineral reserves do not have economic viability.
7. Numbers may not add due to rounding.

8. The resource estimate was prepared by Todd McCracken, P.Geo, of BBA E&C Inc. in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101").

#### About Caprock Mining Corp.

Caprock Mining Corp. is a Canadian mineral exploration company focused on exploring precious metals in Quebec and Ontario.

The Company has an option to earn a 100% interest in the Destiny gold property that comprises 127 mineral claims and encompasses an area of 5,013 hectares located less than two hours' drive from Val d'Or, Quebec. Destiny lies along a major deformation corridor in the Abitibi greenstone belt that includes the prolific Cadillac-Larder Lake, Destor-Porcupine and Casa Berardi fault zones which host numerous producing and development-stage gold deposits. The Project overlies a 6.0 km long segment of the poorly explored Despinassy shear zone which is a splay off the regional Chicobi Fault. Destiny hosts a significant, open pit-constrained, NI 43-101 compliant mineral resource estimate published in March 2025.

Additionally, the Company holds a 100% interest in three gold exploration properties in the historical Beardmore-Geraldton Gold Belt of Ontario - a belt that has produced over four million ounces of gold historically (Reference: Beardmore-Geraldton Gold Camp - Tashota Resources), and contains the sizeable Greenstone gold project (formerly known as the Hardrock gold project) which is being brought to production by Equinox Gold (Reference: Greenstone Gold Mines - Mining & Processing).

Historical drill intercepts for drill holes DES-01-59 and DES-01-60 have been referenced from the "NI 43-101 Technical Report And Resource Estimate Of The DAC Deposit, Destiny Property, Quebec" prepared for Alto Ventures Ltd. and Pacific Northwest Capital Corp. by Todd McCracken, P.Geo. of Wardrop a Tetra Tech Company, with an effective date of March 1, 2011.

The scientific and technical information disclosed in this release has been reviewed and approved by Mr. Vishal Gupta, the Company's President & CEO. Mr. Gupta is a P.Geo. registered with the Professional Geoscientists of Ontario (PGO) and considered a "Qualified Person" as defined under NI 43-101.

#### Forward Looking Statements

All statements in this press release about anticipated future events or results constitute forward-looking statements including, but not limited to, statements with respect to: the Company's plans and expectations for the Property, the potential for underground mineable resources at the Property, the timing of the exploration on the Property and the timing of the completion of the expansion of the MRE, the potential for additional gold mineralization on the Property and the timing of the announcement of the Company's exploration plan for the Property. Forward-looking statements are often, but not always, identified by the use of words such as "seek", "anticipate", "believe", "plan", "estimate", "expect" and "intend" and statements that an event or result "may", "will", "should", "could" or "might" occur or be achieved and other similar expressions. Although Caprock believes that the expectations reflected in such forward-looking statements and/or information are reasonable, undue reliance should not be placed on forward-looking statements since Caprock can give no assurance that such expectations will prove to be correct. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements, including the risks, uncertainties and other factors identified in Caprock's periodic filings with Canadian securities regulators. Forward-looking statements are subject to business and economic risks and uncertainties and other factors that could cause actual results of operations to differ materially from those contained in the forward-looking statements. Important factors that could cause actual results to differ materially from Caprock's expectations include risks associated with the business of Caprock; risks related to reliance on technical information provided by Caprock; risks related to exploration and potential development of the Company's mineral properties; business and economic conditions in the mining industry generally; fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of mineral deposits; the need for cooperation of government agencies and First Nation groups in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs and uncertainty of meeting anticipated program milestones; uncertainty as to timely availability of permits and other governmental approvals; and

other risk factors as detailed from time to time and additional risks identified in Caprock's filings with Canadian securities regulators on SEDAR+ in Canada (available at [www.sedarplus.ca](http://www.sedarplus.ca)). Forward-looking statements are based on estimates and opinions of management at the date the statements are made. Caprock does not undertake any obligation to update forward-looking statements except as required by applicable securities laws. Investors should not place undue reliance on forward-looking statements.
