

International Lithium Corp. Reports Results of 2025 Annual General Meeting

13:15 Uhr | [Newsfile](#)

Vancouver, December 23, 2025 - [International Lithium Corp.](#) (TSXV: ILC) (OTCQB: ILHMF) (FSE: IAH) (the "Company" or "ILC") is pleased to announce that all resolutions proposed at the Company's annual general meeting of shareholders held on December 22, 2025 were passed. All agenda items outlined in the information circular for the meeting were approved and all director nominees were elected, with over 99% of votes cast in favour of all the motions. The directors elected for the ensuing year are John Wisbey, Maurice Brooks, Anthony Kovacs, Ross Thompson, and Geoffrey Baker.

About International Lithium Corp.

International Lithium Corp. is a Critical Minerals exploration company with exploration activities in Ontario, Canada, with intentions to expand into Southern Africa. It has projects at various stages, ranging from Definitive Feasibility Study at Rubicon in Namibia (note that ILC currently has an option only and is treating this as historic information at this point and not a current resource for ILC) to Preliminary Economic Assessment at Raleigh Lake (as noted above) to Pre-Drilling at Wolf Ridge. The primary target metals in Canada are lithium, rubidium and copper. There are three projects (two in Ontario and one in Ireland) in which ILC has sold its share but where we stand to receive future payments from either a resource milestone being achieved or from a Net Smelter Royalty. In Namibia the Karibib project contains lithium, rubidium and cesium.

While the world's politicians are currently divided on the future of the energy market's historic dependence on oil and gas and on "Net Zero", there is in any scenario an ever increasing and significant demand for electricity driven by AI and data centres, and by a likely unstoppable momentum towards electric vehicles and grid-scale electricity storage. All these contribute to rising demand for lithium and copper as well as other metals. Rubidium is also a valuable critical metal that is strategic for high-precision clocks and for space technology. We have seen the politically driven and increasingly urgent wish by the USA, Canada, EU and other major economies to safeguard their supplies of critical metals and to become more self-sufficient. Our Canadian and Southern African projects, which contain lithium, rubidium, cesium and copper, are strategic in that respect.

Our key mission for the next decade is to generate revenue for our shareholders from lithium and other battery metals, as well as rare metals, while also contributing to the creation of a greener, cleaner planet and less polluted cities.

This includes optimizing the value of our existing projects in Canada as well as finding, exploring and developing projects that have the potential to become world-class deposits. We have announced that we regard Southern Africa as a key strategic target market for ILC and, in addition to Namibia, we have applied for and hope to receive EPOs in Zimbabwe. We hope to make further announcements on the portfolio developments over the next few weeks and months.

The Company's interests in various projects now consist of the following, and in addition, the Company continues to seek other opportunities:

Name	Metal	Location	Stage	Area in Hectares	Current Ownership Percentage	Future Ownership options exercised and/or residual interest	Operator or JV Partner
Rubicon + Helikon + Exclusive Prospecting							

Licence

Lithium	2021 : Feasibility				
Rubidium Karibib, Namibia	Study completed	29,500	0 %	80%	Lepidico; ILC if
Cesium	for Li, Rb and Cs				option exercised

Name	Metal	Location	Stage	Area in Hectares	Current Ownership Percentage	Future Ownership options exercised and/or residual interest	Operator or JV Partner
Raleigh Lake	Lithium Rubidium	Ontario	Dec 2023 : PEA for Li completed Apr 2023 Maiden Resource Estimates for Li and Rb	32,900	100%	100%	ILC
Firesteel	Copper Cobalt	Ontario	Aeromagnetism and Drilling started mid 2024	6,600	90%	90%	ILC
Wolf Ridge	Lithium	Ontario	Pre-Drilling	5,700	0%	100%	ILC
Mavis Lake	Lithium	Ontario	May 2023 Maiden Resource Estimate	2,600	0%	0% (carries an extra earn-in payment of AUD\$ 0.75 million if resource targets met)	Critical Resources Limited (ASX: CRR)
Avalonia	Lithium	Ireland	Drilling	29,200	0%	0% 2.0% Net Smelter Royalty	GFL Intl Co Ltd. (owned by Ganfeng Lithium Group Co. Ltd)
Forgan/Lucky Lakes	Lithium	Ontario	Drilling	< 500	0%	0% 1.5% Net Smelter Royalty	Power Minerals Limited (ASX: PNN)

The Company's primary strategic focus at this point is on the Raleigh Lake Project, comprising lithium and rubidium, and the Firesteel copper project in Canada, as well as obtaining EPOs and mineral claims in Zimbabwe. The Karibib projects in Namibia, including further development on the EPL there, will become a high focus if ILC exercises its option there.

The Raleigh Lake Project now encompasses 32,900 hectares (329 square kilometres) of mineral claims in Ontario and represents ILC's most significant project in Canada. To date, drilling has occurred on less than 1,000 hectares of our claims. A Preliminary Economic Assessment was published for ILC's lithium at Raleigh Lake in December 2023, with a detailed economic analysis of ILC's separate rubidium resource still pending. Raleigh Lake is 100% owned by ILC, free from any encumbrances and royalties. The Raleigh Lake Project boasts excellent access to roads, rail, and utilities.

A continuing goal has been to remain a well-funded company to turn our aspirations into reality. Following the disposal of the Mariana project in Argentina in 2021, the Mavis Lake project in Canada in 2022, and the Avalonia project in 2025, ILC continues to achieve sufficient inward cash flow to be able to make progress with its exploration projects.

With the increasing demand for high-tech rechargeable batteries used in electric vehicles, electrical storage, and portable electronics, lithium has been designated "the new oil" and is a key part of a green energy, sustainable economy. By positioning itself with projects that have significant resource potential and solid strategic partners, ILC aims to be one of the preferred lithium and rare metals resource developers for investors and to continue building value for its shareholders for the rest of the 2020s, the decade of battery metals.

On behalf of the Company,

John Wisbey
Chairman and CEO

Cautionary Statement Regarding Forward-Looking Information

Except for statements of historical fact, this news release or other releases contain certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information or forward-looking statements in this or other news releases may include: the timing of completion of any offering and the amount to be raised, the likelihood or otherwise of the Company exercising its option on Lepidico Mauritius, the outcome of arbitration involving Lepidico Namibia, the effect of results of anticipated production rates, the timing and/or anticipated results of drilling on the Karibib or Raleigh Lake or Firesteel or Wolf Ridge projects, the expectation of resource estimates, preliminary economic assessments, feasibility studies, lithium or rubidium or copper recoveries, modeling of capital and operating costs, results of studies utilizing various technologies at the company's projects, the Company's budgeted expenditures, future plans for expansion in Southern Africa and planned exploration work on its projects, increased value of shareholder investments in the Company, the potential from the Company's third party earn-out or royalty arrangements, the future demand for lithium, rubidium, cesium and copper, and assumptions about ethical behaviour by our joint venture partners or third party operators of projects or royalty partners. Such forward-looking information is based on assumptions and subject to a variety of risks and uncertainties, including but not limited to those discussed in the sections entitled "Risks" and "Forward-Looking Statements" in the interim and annual Management's Discussion and Analysis which are available at www.sedarplus.ca. While management believes that the assumptions made are reasonable, there can be no assurance that forward-looking statements will prove to be accurate. Should one or more of the risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking information. Forward-looking information herein, and all subsequent written and oral forward-looking information are based on expectations, estimates and opinions of management on the dates they are made that, while considered reasonable by the Company as of the time of such statements, are subject to significant business, economic, legislative, and competitive uncertainties and contingencies. These estimates and assumptions may prove to be incorrect and are expressly qualified in their entirety by this cautionary statement. Except as required by law, the Company assumes no obligation to update forward-looking information should circumstances or management's estimates or opinions change.
