ZincX Resources Corp. to Host Investor Call

09.10.2018 | FSCwire

Vancouver, British Columbia (FSCwire) - Following the release of ZincX Resources Corp.'s (“ZincX Resources&
“the Company”, TSX Venture Exchange: ZNX) positive preliminary economic assessment (PEA) of the C
Creek (Akie Property) Zinc-Lead-Silver deposit, interest in the Company and its projects has increased significantly.

Peeyush Varshney, Chief Executive Officer of ZincX Resources, commented: "The positive results outlined in the PEA
demonstrate a robust, stand-alone base metal project with a large and potentially growing resource base, all-season ac
good rail and road infrastructure, and amenable to conventional mining and milling practices common to similar projects
delighted with the strong results of the PEA and intend to now move to advance the project through feasibility, permittin
towards production.”

In response to recent increased investor interest, the company will host an investor call with Mr. Varshney on Friday, O
12, 2018, at 1:15 pm PST. There will be a question-and-answer session following the call for participants.

Topics to be discussed will include:

- The progress and milestones achieved over the past year;
- The PEA and what the numbers mean; and
- Objectives of the current exploration program on the Akie Property.

The call will be open to a maximum number of participants. Once at capacity, callers will be placed in a queue. The cor
cannot guarantee any spaces on the call as it is hosted by a third party and operates on a first-come basis.

Dial-in numbers:

Toll-free dial-in number from Canada and the United States: 1-877-216-4736

Toll-free dial-in number from Germany: +49 0-800-180-2557

+49 0-800-183-8208 (mobile)

Toll-free dial-in number from Switzerland:+41 080-083-4650

Participant passcode: 2448400383

Should you need a dial-in number for a country that is not listed above please email kylie@varshneycapital.com with th
you will be calling from and we would be happy to provide the corresponding number.

The Akie Zn-Pb-Ag Project

The 100% owned Akie property is situated within the Kechika Trough, the southernmost area of the regionally extensive
Paleozoic Selwyn Basin and one of the most prolific sedimentary basins in the world for the occurrence of SEDEX
zinc-lead-silver and stratiform barite deposits.

Drilling on the Akie property by ZincX Resources (formerly Canada Zinc Metals Corp) since 2005 has identified a signif
body of baritic-zinc-lead SEDEX mineralization known as the Cardiac Creek deposit. The deposit is hosted by siliceous

carbonaceous, fine grained clastic rocks of the Middle to Late Devonian Gunsteel Formation.

With additional drilling completed in 2017, the Company has updated the estimate of mineral resources at Cardiac Cree
follows:

5% Zinc Cut-Off Grade					Contained Metal:		
Category	Tonnes (million)	Zn (%)	Pb (%)	Ag (g/t)	Zn (B lbs)	Pb (B lbs)	Ag (M oz)
Indicated	22.7	8.32	1.61	14.1	4.162	0.804	10.3
Inferred	7.5	7.04	1.24	12.0	1.169	0.205	2.9

The Company announced robust positive results from the 2018 Preliminary Economic Assessment (PEA). The PEA en
conventional underground mine and concentrator operation with an average production rate of 4,000 tonnes per day. T
will have an 18-year life with potential to extend the life-of-mine (LOM) through resource expansion at depth.

Pre-Tax		After-Tax	
NPV$_{7\%}$	IRR	NPV$_{7\%}$	IRR
$649M	35%	$401M	27%

The base case parameters for the PEA used US$1.21/lb Zinc, US$1.00/lb Lead, and US$16.50/oz Silver

See ZNX news releases from June 20th, 2018 for important disclosures with respect to the Cardiac Creek PEA.

The PEA is considered preliminary in nature and includes mineral resources, including inferred mineral resources that a
considered too speculative geologically to have the economic considerations applied to them that would enable them to
categorized as mineral reserves. Mineral resources that are not mineral reserves have not yet demonstrated economic
Due to the uncertainty that may be attached to mineral resources, it cannot be assumed that all or any part of a mineral
will be upgraded to mineral reserves. Therefore, there is no certainty that the results concluded in the PEA will be realiz

Kechika Regional Project

In addition to the Akie Project, the Company owns 100% of eight of eleven large, contiguous property blocks that comp
Kechika Regional Project including the advanced Mt. Alcock prospect. The Kechika Regional Project also includes the
and Cirque East properties within which the Company maintains a significant 49% interest with partners Teck Resource
(TSX: TECK.B) and Korea Zinc Co. Ltd. These properties collectively extend northwest from the Akie property for appro
140 kilometres covering the highly prospective Gunsteel Formation shale; the main host rock for known SEDEX zinc-le
deposits in the Kechika Trough of northeastern British Columbia. These projects are located approximately 260 kilomet
northwest of the town of Mackenzie, British Columbia, Canada.
