

Britannia Mining and Bullet Blockchain Complete Merger - Filing with the Nevada Secretary of State and OTC Markets Group

19.08.2021 | [Accesswire](#)

The Britannia-Bullet Merger Has Been Completed with Only a Few Filings and Submissions Remaining Before Name Change and Reverse Split are Initiated

NEW YORK, August 19, 2021 - [Britannia Mining Inc.](#) ("Britannia" or the "Company"), (OTC PINK:BMIN) announced today, that the Company has merged with Bullet Blockchain, LTD. (Bullet), to pivot from physical mining operations, into the crypto mining industry, with an initial focus on bitcoin mining.

The Company has merged with Bullet to take advantage of the rapid growth experienced within the crypto mining industry. Companies like Riot Blockchain and Marathon Digital Holdings have helped to place first movers and early adopters onto a field of innumerable opportunities. Even recent news of BitFarms' Q2 2021 Financial Results-highlighting amongst other achievements, that BitFarms "received and installed 3,461 miners" during the past quarter, with "revenues of \$36.7M"-both evidence the potential of the Britannia-Bullet merger to compete in one of the fastest growing, emerging industries of today. Bullet has already demonstrated its ability to meet expectations-taking possession of 3,500 ASIC Miners to solidify its initial bitcoin mining operations-increasing its 'year-one' anticipated buildout capacity up to a 200 megawatt facility, for a hash rate capacity of 6,000 petahash.

Mr. Bradley Rudman has resigned from his executive post as President, Secretary, and member of the Board of Directors of Britannia, as Mr. Imran Ellis, a Founding Director of Bullet Blockchain, succeeds him as the Company's President and CEO.

Mr. Ellis has long been a leading industry advocate for Bitcoin and Blockchain ledger technologies; working with ASIC chip manufacturers Canaan, Bitmain, and Bitfury. Mr. Ellis, who has also developed strong relationships with semiconductor companies TSMC, Samsung, and Global Foundries, will bring a team of well-seasoned tech executives, consultants, service providers, and international investors. Mr. Ellis also brings infrastructure partners that have helped to position Bullet as a well-capitalized upstart in the crypto mining space; beginning with Bullet announcing its entry into the crypto markets in early 2021. Bullet's infrastructure partners have helped to create an environment where Bullet can enter this merger with a 'turnkey' operation-benefiting from access to capital, as well as highly coveted hardware, land, buildings, gas, generators, racks, security, etc.

As noted in the August 17th, 2021 Supplemental Disclosure, on August 11th, 2021, Britannia and Bullet entered into a Merger Agreement and Plan of Merger, and on August 13th, 2021, the Company filed the Certificate of Merger and Plan of Merger with the Nevada Secretary of State. Furthermore, on August 16th, 2021, the Company filed with the Nevada Secretary of State and updated Imran Ellis as the President and Director of the Company and filed the 'Change of Control' with the OTC Markets Group, Inc.

Lastly, and as agreed upon in the Plan of Merger Agreement between Britannia and Bullet, Britannia will undergo a name change and plans to restructure the capitalization table through a reverse stock split. As discussed in previous announcements by Bullet, much care and attention has been given to how the Company will ultimately be restructured-with an ongoing commitment to protecting existing shareholders and creating an equitable opportunity for smaller stakeholders. Shareholders will be given additional details on the proposed reverse split, along with other updates, as the Company continues with additional filings and submissions to complete the regulatory review to finalize the name change and reverse split with regulators.

About Bullet Blockchain

Bullet Blockchain, LTD. is a blockchain technology company in the Republic of Ireland that secures the bitcoin blockchain ledger. Bullet has secured partnerships that affords the Company access to highly coveted hardware, land, buildings, gas, generators, racks, security, etc. Bullet has secured 200 megawatts of electricity and infrastructure capacity for 6,000 petahash and has deployed an initial hardware fleet of 3,500 next generation ASIC miners-focused on bitcoin mining - with an initial hash rate capacity of 315 petahash and 12 megawatts of electricity.

Bullet is confident it can manage its bitcoin mining operations at a far lesser cost per kilowatt than industry competitors, therefore producing bitcoin at a lower cost with greater profit. Bullet is focused on efficiency, stability, transparency, and scalability, and plans to swiftly scale operations to 60,000 miners within the next 12 months.
