

Update on the Goldstorm Mineral Resource Estimate and Project Development -- Treaty Creek Property, Golden Triangle, British Columbia

25.01.2023 | [The Newswire](#)

January 25 - Victoria, Canada -- [Teuton Resources Corp.](#) ("Teuton" or "the Company") (TSXV:TUO) (OTC:TEUTF) (Frankfurt:TFE) announces that it has received a corporate update made by its Joint Venture Partner [Tudor Gold Corp.](#) ("Tudor Gold") with respect to the Treaty Creek Property, northwestern BC. Teuton was the original staker of the Treaty Creek property, host to the large Goldstorm deposit, assembling the core land position in 1985. It presently holds a 20% carried interest in Treaty Creek (Tudor Gold is responsible for paying all exploration costs up until such time as a production decision is made and owns a 60% interest; American Creek Resources owns the remaining 20% interest, also carried). Additionally, Teuton owns a 0.98% Net Smelter Royalty in the Goldstorm deposit area. It also owns numerous additional royalty interests within the Sulphurets Hydrothermal system on properties such as the King Tut, Tuck, High North, Orion, Delta and Fairweather properties.

Ken Konkin, CEO of Tudor Gold, stated: "Our Treaty Creek Project possesses the potential for several years of exploration to host another Goldstorm Deposit with numerous recently discovered, significant Au-Cu-Ag targets. Our largest drill target, Perfectstorm lies on-trend and is equidistant from our Goldstorm Deposit and Seabridge Gold's Iron Cap Deposit at a distance of 2.5 kilometers to each deposit. The Perfectstorm system holds a very high priority as a drill target, however, our top priority is to drill off the Goldstorm Deposit with the focus on the CS-600 copper-gold-silver domain, as it remains open in all directions and at depth."

Corporate Update on the Goldstorm Mineral Resource Estimate and Project Development as Provided by Tudor Gold

Tudor Gold continues to move forward on an updated Mineral Resource Estimate (MRE) for its Goldstorm Deposit at Treaty Creek by completing an updated geologic model and advancing the understanding of the mineral distribution at Goldstorm. The Company anticipates that the MRE update will be announced within Q1 2023 and is expected to focus on higher grades to increase the overall quality of gold, silver, and copper resources.

Recent construction of an exploration access road by our heavy equipment operators has connected the property's lower camp to the weather station area located two kilometers downstream from the lower camp. It is expected that this road will be further extended in order to connect to Seabridge's Tailings Access Road. Seabridge Gold has made excellent progress in connecting their tailing site which is located 17 kilometers from Highway 37, including a large bridge that crosses the Bell Irving River, at no cost to Tudor Gold. The construction of this tailings access road is expected to be completed later in 2023. Once the 17-kilometer Seabridge Tailings access road is completed, only a 14-kilometer road will remain to be built, which is completely permitted for construction. Following completion of all road construction it is expected that Tudor Gold's Treaty Creek Project will have year-round all-season vehicle access. In addition, it is the Company's understanding that Seabridge also plans to bring in a power line to their tailings site area bringing additional infrastructure much closer to our claim boundary.

Tudor Gold is also pleased to report that the 2-year baseline hydrology and water quality studies are anticipated to be completed by March 2023. This will satisfy a major milestone for future permitting requirements and bring the project one step closer to potential production phase.

Dino Cremonese, P. Eng., CEO and President of Teuton, commented as follows: "Progress continues at Treaty Creek against a backdrop of rising gold prices, a fine start to 2023."

Qualified Person

The Qualified Person for the Treaty Creek technical information in this news release is Tudor Gold's President and CEO, Ken Konkin, P.Geo. Mr. Dino Cremonese, P. Eng., CEO and President of Teuton, is the Qualified Person for Teuton Resources. Although he has not independently verified the technical data presented in this news release he has no reason to believe it is inaccurate. Mr. Cremonese, as a director and CEO of Teuton, is not independent of the Company.

About Teuton

Teuton owns interests in more than thirty properties in the prolific "Golden Triangle" area of northwest British Columbia and was one of the first companies to adopt what has since become known as the "prospect generator" model. This model minimizes share equity dilution while at the same time maximizing opportunity. Earnings provided from option payments (received in cash and often also in shares of the optionee companies), has provided Teuton with substantial income over the years.

Interested parties can access information about Teuton at the Company's website, www.teuton.com.

Respectfully submitted,

"Dino Cremonese, P.Eng."
