## Verde appoints Marcus Ribeiro as Vice President Sales

02.02.2024 | GlobeNewswire

SINGAPORE, Feb. 02, 2024 - <u>Verde AgriTech Ltd.</u> (TSX: "NPK") ("Verde" or the "Company") is pleased to announce Marcus Ribeiro as Vice President Sales. Mr. Ribeiro will lead a skilled team of 7 account managers, overseeing 2,468 of Verde's clients. These clients collectively cultivate over 940,000 hectares and present a potential purchase volume of 1.4 million tons of Product. Mr. Ribeiro's responsibilities extend to managing Verde's indirect sales team, with a portfolio that includes 110 independent sales agents and distributors. This segment of sales has played a significant role in the Company's revenue, contributing 46% of the Company's sales volume in 2021, 41% in 2022, 37% in 2023. Mr. Ribeiro brings over 20 years of experience in Agribusiness, encompassing roles in commercial, technical, administrative and personnel management.

During his tenure as Sales Manager at Timac Agro,<sup>1</sup> a French multinational part of the Roullier Group known for manufacturing and marketing specialty fertilizers, Mr. Ribeiro garnered significant recognition. In this role, Mr. Ribeiro was acclaimed as one of the top three sale managers in Brazil for two consecutive years due to his outstanding results.

In his capacity as a Partner and Sales Manager at Grupo Casa Bugre, <sup>2</sup> Mr. Ribeiro was responsible for the agricultural bio-inputs and fertilizers for six years. He led the Agrivalle<sup>3</sup> branch, providing national and international markets with transformative and sustainable solutions. His portfolio included a robust range of specialty fertilizers, biological products, adjuvants, inoculants, and additives, with a particular focus on the states of Mato Grosso and Minas Gerais.

"A native of São Gotardo, Minas Gerais - the heart of Verde's operations - Mr. Ribeiro has built a remarkable career across Brazil's major agricultural regions. He has a proven record in leading diverse agricultural sectors, particularly in the specialty fertilizers market. His deep understanding of market dynamics, customer trends, along with his expertise in building partnerships, driving sales growth, and enhancing operational efficiency are key to fully capitalize on the potential of our sales channels and amplifying our market presence," stated Cristiano Veloso, Verde's Founder and CEO.

In his new role, Mr. Ribeiro will focus on boosting customer retention and development, implementing personalized relationship strategies, and nurturing solid partnerships. His approach, deeply rooted in understanding client needs and creating customized sales and development strategies, aligns with Verde's mission to meet and exceed client expectations. This strategic appointment is a significant move in Verde's continuous effort to fortify its position in the agricultural sector and adapt to the changing needs of our clients.

Mr. Ribeiro holds a degree in Agricultural Engineering from the University Center of Patos de Minas (UNIPAM), a degree in Business Administration and Management from the University of São Gotardo (FACIG), and a postgraduate degree in Agronomy, Soils and Plant Nutrition, with a focus on Soil Fertility Management in the Cerrado region.

"I am thrilled to join the Verde AgriTech team," said Mr. Ribeiro. "The Company's vision for innovation, growth, and sustainability aligns with my values. I look forward to applying my experience to further develop our relationship management and sales strategies, reinforcing our market position and enhancing our customer-centric approach," affirmed Mr. Ribeiro.

About Verde AgriTech

Verde is an agricultural technology Company that produces potash fertilizers. Our purpose is to improve the

14.05.2024 Seite 1/4

health of all people and the planet. Rooting our solutions in nature, we make agriculture healthier, more productive, and profitable.

Verde is a fully integrated Company: it mines and processes its main feedstock from its 100% owned mineral properties, then sells and distributes the Product.

Verde's focus on research and development has resulted in one patent and eight patents pending. Among its proprietary technologies are Cambridge Tech, 3D Alliance, MicroS Technology, N Keeper, and Bio Revolution.<sup>4</sup> Currently, the Company is fully licensed to produce up to 2.8 million tons per year of its multinutrient potassium fertilizers K Forte® and BAKS®, sold internationally as Super Greensand®. In 2022, it became Brazil's largest potash producer by capacity. Verde has a combined measured and indicated mineral resource of 1.47 billion tons at 9.28% K<sub>2</sub>O and an inferred mineral resource of 1.85 billion tons at 8.60% K<sub>2</sub>O (using a 7.5% K<sub>2</sub>O cut-off grade).<sup>5</sup> This amounts to 295.70 million tons of potash in K<sub>2</sub>O. For context, in 2021 Brazil's total consumption of potash in K<sub>2</sub>O was 6.57 million<sup>6</sup>.

Brazil ranks second in global potash demand and is its single largest importer, currently depending on external sources for over 97% of its potash needs. In 2022, potash accounted for approximately 3% of all Brazilian imports by dollar value.<sup>7</sup>

Cautionary Language and Forward-Looking Statements

All Mineral Reserve and Mineral Resources estimates reported by the Company were estimated in accordance with the Canadian National Instrument 43-101 and the Canadian Institute of Mining, Metallurgy, and Petroleum Definition Standards (May 10, 2014). These standards differ significantly from the requirements of the U.S. Securities and Exchange Commission. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.

This document contains "forward-looking information" within the meaning of Canadian securities legislation and "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995. This information and these statements, referred to herein as "forward-looking statements" are made as of the date of this document. Forward-looking statements relate to future events or future performance and reflect current estimates, predictions, expectations or beliefs regarding future events and include, but are not limited to, statements with respect to:

- (i) the estimated amount and grade of Mineral Resources and Mineral Reserves;
- (ii) the estimated amount of CO<sub>2</sub> removal per tonne of rock;
- (iii) the PFS representing a viable development option for the Project;
- (iv) estimates of the capital costs of constructing mine facilities and bringing a mine into production, of sustaining capital and the duration of financing payback periods;
- (v) the estimated amount of future production, both produced and sold;
- (vi) timing of disclosure for the PFS and recommendations from the Special Committee;
- (vii) the Company's competitive position in Brazil and demand for potash; and,
- (viii) estimates of operating costs and total costs, net cash flow, net present value and economic returns from an operating mine.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives or future events or performance (often, but not always, using words or phrases such as "expects", "anticipates", "plans", "projects", "estimates", "envisages", "assumes", "intends", "strategy", "goals", "objectives" or variations thereof or stating that certain actions, events or results "may", "could",

14.05.2024 Seite 2/4

"would", "might" or "will" be taken, occur or be achieved, or the negative of any of these terms and similar expressions) are not statements of historical fact and may be forward-looking statements.

All forward-looking statements are based on Verde's or its consultants' current beliefs as well as various assumptions made by them and information currently available to them. The most significant assumptions are set forth above, but generally these assumptions include, but are not limited to:

- (i) the presence of and continuity of resources and reserves at the Project at estimated grades;
- the estimation of CO<sub>2</sub> removal based on the chemical and mineralogical composition of assumed resources and reserves;
- (iii) the geotechnical and metallurgical characteristics of rock conforming to sampled results; including the quantities of water and the quality of the water that must be diverted or treated during mining operations;
- (iv) the capacities and durability of various machinery and equipment;
- (v) the availability of personnel, machinery and equipment at estimated prices and within the estimated delivery times:
- (vi) currency exchange rates;
- (vii) Super Greensand® and K Forte® sales prices, market size and exchange rate assumed;
- (viii) appropriate discount rates applied to the cash flows in the economic analysis;
- (ix) tax rates and royalty rates applicable to the proposed mining operation;
- (x) the availability of acceptable financing under assumed structure and costs;
- (xi) anticipated mining losses and dilution;
- (xii) reasonable contingency requirements;
- (xiii) success in realizing proposed operations;
- (xiv) receipt of permits and other regulatory approvals on acceptable terms; and
- (xv) the fulfilment of environmental assessment commitments and arrangements with local communities.

Although management considers these assumptions to be reasonable based on information currently available to it, they may prove to be incorrect. Many forward-looking statements are made assuming the correctness of other forward looking statements, such as statements of net present value and internal rates of return, which are based on most of the other forward-looking statements and assumptions herein. The cost information is also prepared using current values, but the time for incurring the costs will be in the future and it is assumed costs will remain stable over the relevant period.

By their very nature, forward-looking statements involve inherent risks and uncertainties, both general and specific, and risks exist that estimates, forecasts, projections and other forward-looking statements will not be achieved or that assumptions do not reflect future experience. We caution readers not to place undue reliance on these forward-looking statements as a number of important factors could cause the actual outcomes to differ materially from the beliefs, plans, objectives, expectations, anticipations, estimates assumptions and intentions expressed in such forward-looking statements. These risk factors may be generally stated as the risk that the assumptions and estimates expressed above do not occur as forecast, but specifically include, without limitation: risks relating to variations in the mineral content within the material identified as Mineral Resources and Mineral Reserves from that predicted; variations in rates of recovery and extraction; the geotechnical characteristics of the rock mined or through which infrastructure is built differing from that predicted, the quantity of water that will need to be diverted or treated during mining operations being different from what is expected to be encountered during mining operations or post closure, or the rate of flow of the water being different; developments in world metals markets; risks relating to fluctuations in the Brazilian Real relative to the Canadian dollar; increases in the estimated capital and operating costs or unanticipated costs; difficulties attracting the necessary work force; increases in financing costs or adverse changes to the terms of available financing, if any; tax rates or royalties being greater than assumed; changes in development or mining plans due to changes in logistical, technical or other factors; changes in project parameters as plans continue to be refined; risks relating to receipt of regulatory approvals; delays in stakeholder negotiations; changes in regulations applying to the development, operation, and closure of mining operations from what currently exists; the effects of competition in the markets in which Verde operates; operational and infrastructure risks and the additional risks described in Verde's Annual Information Form filed with SEDAR in Canada (available at www.sedar.com) for the year ended December 31, 2021. Verde cautions that the foregoing list of factors that may affect future results is not exhaustive.

When relying on our forward-looking statements to make decisions with respect to Verde, investors and

14.05.2024 Seite 3/4

others should carefully consider the foregoing factors and other uncertainties and potential events. Verde does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by Verde or on our behalf, except as required by law.
